Gaelic Services in Boston Presbyterian Church

Richmond County People Listed on Early Roll of Church That Plans 50th Anniversary in May

BOSTON, Feb. 15—For many years, Scottish folk who came to Massachusetts from Cape Breton have worshipped in their own churches, heard ministers from New and Old Scotland speak to them in Gaelic, and maintained their own customs in their adopted country.

Next May, one of the leading Cape Breton Churches, the Scotch Presbyterian, will celebrate the 50th anniversary of its founding by the MacKinnons, the Ferguson's, the MacKays, MacLoods, MacLeans and other family names as familiar in the roll call of this congregation as in the purple hills of that land of scenic charm, which is their ancestral home.

Looking up from the yellowed pages of the Chronicle, a church publication of the early days, the present pastor, Rev. Hugh Ferguson, who comes from Glace Bay, told me the story of the Scotch Presbyterian Church in the unmistakable accent of his native heath.

'Our church was organized," he said, "by people who came here mostly from Cape Breton county. With others, including Pictou County folk and two or three from auld Scotland, they began first in the 1880's to hold Gaelic prayer meetings at each others' houses and later they rented the old Sw... Hall for their services.

"As the membersh... ly, t... we shall celebrate the move... the first church property. Strange enough it was originally a Jewish synagogue and was sold to us, I believe by the Young Men's Christian Association."

It was during Rev. Mr. Ferguson's pastorate that the present edifice, a commodious church building at the corner of West Brookline and Tremont Streets with a seating capacity of 1,500 was purchased, and in this building next May former Cape Bretoners will hear a prominent Nova Scotia minister speak to them in their beloved Gaelic.

Mrs. Annie MacDonald, one of the original members of the church who came from Lake Ainslie still attends regularly the Sabbath evening services, as does A. J. Morrison of Boularderie, another pioneer, Archibald MacLean of Marion Bridge, was one of the first elders and one foremost in the fuunding of the church. His widow is a member of the congregation today.

Other early church members listed in the Chronicle in 1888 are Mr. and Mrs. Alexander MacKinnon, Inverness County; John L. Ferguson of Ferguson's Lake and Mrs. Ferguson who came from Little Narrows; Misses Christie, Sarah and Maude MacLean of Lake Ainslie; Daniel MacKay of Lake Ain...

...ssertion of Truro... ...oy Davis of Boston University, that "New England is more Nova Scotian that is Nova Scotia herself."

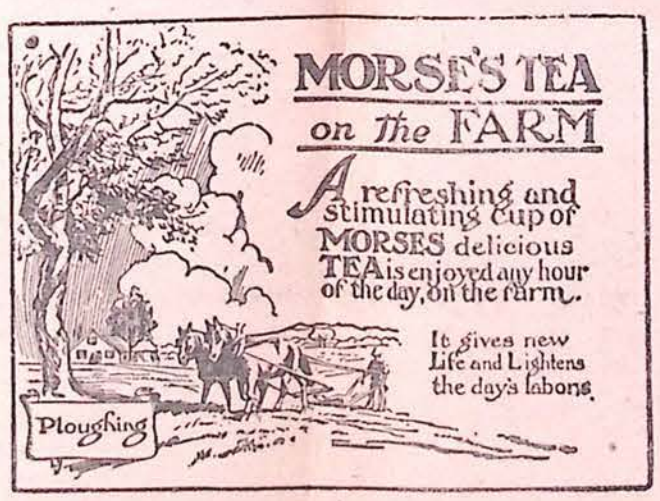

ELDERS LISTED

D. N. McKillop of Loch Lomond clerk; Neil MacIntvre. Loch Lomond; Daniel McAulay, Sydney; John C. MacKinnon, Mabou; Neil D. MacKay, Lake Ainslie; John R. MacPherson, Bridgeport; James A. Stewart, St. Peter's; Malcolm MacMillan, Whycocomagh; Neil MacLean, Lake Ainslie; D. J. Ferguson, Ferguson's Lake.

BOARD OF TRUSTEES

John A. MacPherson, Bridgeport, Chairman; Robert Morton Scotland, Secretary; Malcolm J. MacLeod, Framboise; Malcolm MacInnis, Isle of Lewis; James A. Stewart, St. Peter's; George MacPhail, River Dennis; Norman MacLeod, Framboise.

Flattery, like vice, is "a monster of such fearful mein, that, to be hated, needs but to be seen." The trouble is that when flattery comes along, most people are blinded to it by their own conceit, They open the door of their mind to it and bid it come in and welcome.

...At this time Lou... ...centre of the French fishing in... ...try in Cape Breton. This little town on the south east coast had received its name from "le Grand Monarque", King Louis. Between the years 1743 vessels from France, Canada, Nova Scotia and New England used to come to Louisbourg for puropses of trade. They brought with them merchandise for which in return they received fish. In this trade the French were the more successful and did not only obtain fish for themselves, but also brought some with them back to other countries of Europe. This meant a double loss for New England. Privateers thronged in the harbour, French cruisers sailed forth to chase and destroy New England fishing boats. Trade became dangerous and fishing almost impossible. This situation explains why New England fishing merchants disliked the French colonies who ruined them. They desired conquest or destruction. A reform in their tactics appeared to be necessary.

The man chosen by destiny to bring about the desired reform was Governor Shirley of Massachusetts, a brave and determined person. When he came into power in 1740, the New Englanders began to talk of attacking Louisbourg. It was a daring suggestion. Louisbourg was entirely surrounded by fortifications thirty feet high. It was further protected by a ditch eighty feet wide. The walls mounted one hundred and sixty-four guns. The entrance to the harbour was protected by 32 heavy guns mounted upon an island.

Undaunted by these dangers, Shirley made his plans. On the sixth of January, 1745, a secret meeting was held in Massachusetts at which Shirley proposed to levy seven hundred men to proceed to Cape Breton and lay siege to Louisburg. In a few weeks a band of four thousand and fifty men was levied, ninety transport ships were assembled and ten ships armed with two hundred cannon each.

Life is, they say, as we make it,
Tell of his faiiures, if yo1 must.
But intermingle them with true praises,
Give him a square deal, and be just!

GRAND ANSE NOTES

Neighbours gathered at the home of Dan H. MacDougall on Wednesday evening and presented him with a nice remembrance. Mr. MacDougall, a C.N.R. forman, has been laid up since the autumn, friends are pleased he is improving. Songs, games and cards passed a pleasant evening, topped off with a nice lunch.

Mr. and Mrs. Hugh MacInnis, Dundee, attended the party here on Wednesday.

Miss Mildred MacLeod, R. N., and her brother Norman, visited friends here on Wednesday.

Bert Buchanan and Dan Alex MacDonald, who are employed at Dundee, spent Sunday at their homes here.

Rev. James P. Kaye, held a cottage prayer meeting at the MacPherson House on Sunday evening, with a large crowd attending.

Graham MacDonald, teacher at the Points and Jack Pringle spent Sunday here.

Neil Gunn, of Dundee, passed through here en-route to New Glasgow on Friday.

Mrs. Hughie A. MacDonald, was a business visitor to Hawkesbury recently.

Friends here are sorry to learn of the serious illness of Mrs. John M. MacInnis of West Bay.

Mrs. R. J. Urquhart and daughter, Barbara, spent the week-end with Mr. and Mrs. John A. MacInnis, St. George's Channel.

Tumbled Ruins in Madrid After Bombings

Ruins in the Plaza de Anton Martin give a striking indication of how Spain's capital looks after the many weeks of aerial bombings and artillery attacks by the rebel besiegers.

...oman did not know, the gift of God and the identity of the person who stood before her. Thou wouldest have asked of him, and he would have given thee living water. God's greatest gifts are available to His children, whatever their merits, simply by asking (Matt. 7: 7, 8). "a common expression for running spring water of a cistern or reservoir, and used as a symbol of spiritual blessings with great frequency in the Old Testament."

11. The woman saith unto Him, Sir, Thou hast nothing to draw with, and the well is deep: whence then hast Thou that living water? The woman finds it impossible to comprehend the spiritual aspects of our Lord's statement, and, for the most part, confines her attention to the matter of drawing literal water from the well immediately before them; yet, in her question, "Whence, then, hast Thou living water?"

12. Art Thou greater than our father Jacob, who gave us the well, and drank thereof himself, and his sons, and his cattle? There is nothing in the Bible to substantiate the claim of the Samaritans that they descended from Joseph, and hence could call Jacob their father. "When the Samaritans asked Alexander the Great to excuse them from tribute in the sabbatical year because, as true sons of Joseph they did not till their land that year, he pronounced their claim an imposture and destroyed Samaria."

13. Jesus answered and said unto her, Every one that drinketh of his water shall thirst again. The Lord Jesus does not stop to compare Himself with Jacob, but He does state a truism which she could not deny, namely, that the water in this well could only temporarily quench the thirst of any who drink of it.

14. But whosoever drinketh of the water that I shall give him shall never thirst. (Cf. 6: 35; Rev. 7: 16; 21: 6) Here Christ gathers to a head innumerable promises of the Old Testament, and thus claims them as fulfilled in Himself; e.g., Isa. 41: 18; 48:21; 49: 10; 55:1. See also Psalm 36:9; Jer. 2: 13; 17:13. But the water I shall give him shall become in him a well of water springing up unto eternal life. Christ received into the heart by a believer imparts eternal life. The spiritual life which we have from Christ can never dry up. It goes on and on for all eternity.

15. The woman saith unto Him,

...ner ...
...en the ...nip ... would be determined ... longer by some geographical limitation.

22. Ye worship that which ye know not: we worship that which we know; for salvation is from the Jews. The Samaritan religion had only the Pentateuch for its Bible: it repudiated the Psalms and the writings of the prophets. Furthermore, it had added many idolatrous practices and pagan superstitions, so that the God whom they worshipped was not the true Jehovah of the Old Testament.

23. But the hour cometh, and now is, when the true worshippers shall worship the Father in spirit and in truth. True worshippers here are contrasted not so much with the insincere as with those who worship imperfectly. That which is imperfect can never be finally true. To worship "in spirit" is to commune with God in one's spirit, for the preposition "in" has reference to the sphere in which worship moves.

For such doth the Father seek to be His worshippers. "The Father is seeking in the Son for true worshippers, and therefore men are encouraged and enabled to seek Him in spirit and truth (John 1: 17)."

24. God is a Spirit. By saying tha God is a Spirit, Christ means that God has no bodily form. On the other hand, God does have substance or essence. God is not a mere idea, or a construction of the mind, like a mathematical formula.

And they that worship Him must worship in spirit and truth. Worship of God which is not in accordance with Gods nature is not true worship.

25. The woman saith unto Him, I know that Messiah cometh (he that is called Christ): when He is come, He will declare unto us all things. This is the only place in the New Testament where Christ is referred to as the Messiah, with the single exception of a proceding notice in this same Gospel (1:41). The word "Messiah means the Anointed One.

26. Jesus saith unto her, I that speak unto thee am He. These words probably did not express a surprising truth to the women, who had been led to see so many great spiritual truths this hour. It is an undeniable acknowledgment, on the part of Christ, that He believed Himself to be the Messiah sent from God. If we do not accept His verdict about Himself, we characterize His as one who spoke falsely, or one who was under a delusion.

Farm Problems

Conducted by

PROFESSOR HENRY G. BELL

with the co-operation of the various departments of Ontario Agricultural College

Question:— (a) "Has there been very much experimental work carried on in Ontario to determine if the use of fertilizer in this province is profitable? Will it pay me to use fertilizer wth my spring grain crop?

(b) I intend to grow 10 acres of table turnips (Rutabagas) on a clay loam soil which will receive eight loads of barnyard manure per acre. What kind of fertilizer would be suitable for these conditions and how should it be sown?'—T. B., Waterloo County.

Answer:—(a) The Ontario Agricultural College has been carrying on fertilizer experiments in various parts of the province for several year. During the last seven years, a very definite campaign of testing the suitability of various fertilizers on the farmers' own farms has been in progress. Over 6500 plots have been conducted on a total of over 1300 farms. This work has proven quite definitely that profit is to be gained by wise use of fertilizers in supplementing the fertility of the soil and of manure which has accumulated on the farm. The average gain in cereals that has been obtained is from 10 to 15 bushels per acre. Fertilizers on potatoes, over a six-year period have given an average increase of 55 bushels per acre. Fertilizers on alfalfa have produced an average increase of almost two tons per acre. All these increases and similar improvement in other crops have been obtained from moderate application of such as 250 lbs. per acre on cereals, 375 lbs. per acre on alfalfa and 750 lbs. per acre on potatoes. At prices which have prevailed for fertilizers and for crops, exceeding good interest on money invested in fertilizer has been realized. (b) On turnips, 2-12-10 fertilizer has given largest yields, at the rate of 200 to 250 lbs. per acre. This is a fairly heavy application to make through the fertilizer dropper attached to the turnip drill. It has been found better practice to drill the fertilizer over the turnip area before the land is ridged for seeding.

Question: (a) "I grow cabbage and cauliflower for early market. My soil is a light sandy loam and I would like to know what fertilizer and the quantity ... should be

(b) I have an eight-year-old asparagus bed which produces an excellent yield so far as quantity is concerned, but after about the third cutting, the tips become stringy. Can this be corrected by the use of a balanced fertilizer and what analysis would you recommend? Also, please give me any other information which you think would benefit the crop. Up until now this asparagus bed has never received anything but barnyard manure.

(c) Do I need to use fertilizer when I follow a rotation in which a green crop, usually alfalfa, is plowed under every four years and the land receives a good application of manure every four to five years."—W. S. S., Essex.

Answer:—(a) For cabbage and cauliflower, good results have been obtained from use of a 4-8-10 fertilizer at the rate of 1500-2000 lbs. per acre. This should be worked into the soil along the rows, before the plants are transplanted. Particularly good results are obtained also from an additional light application of nitrate of soda around the plants, but not touching them, about two weeks after the plants have been set out and sometimes again at a period of another two weeks. Do not apply more than 10 lbs. per acre in one application.

(b) Asparagus can be helped materially by the addition of fertilizer in spring. We would not advise a mixed fertilizer, but an application of 100-200 lbs. per acre of nitrate of soda, or cyanamid, should give good results This shoulc be scattered along the asparagus rows before the tips begin to show and worked into the soil by light harrowing After the asparagus is cut, the application of such fertilizer as 4-8-10 gives great strength to the crop for the next year.

(c) The rotation of crops which includes legumes such as alfalfa and sweet clover or common clover, adds organic matter to the soil and makes some addition of nitrogen. Other crops take out nitrogen, phosphoric acid and potash, and of course legumes remove considerable potash and phosphoric acid from the soil. If manure is added, quite a bit of nitrogen will be supplied, a small amount of phosphoric acid and a valuable amount of potash, so that for general cropping systems with good rotation of crops, there is necessity for addition of ... phosphoric acid. Whether or not there is need of more nitrogen will depend entirely on the type of farming and the soil type.

Movie-radio gossip

By DOROTHY

Jessica Dragonette, who's been singing on the air practically ever since there's been any broadcasting, is branching out for herself with a new weekly series of half-hour musical programs each Wednesday night from nine-thirty till ten, on CBS. First tim she's been on a coast-to-coast series, after ten years of radio work.

* * *

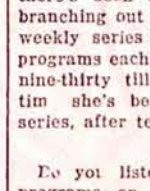

Do you listen to the Kate Smith programs, on which various unsung heroes and heroines appear, tell their story, and then receive votes from listeners-in? If you heard seven-year-old Mary Louise McCroskey and liked her you'll be glad to hear that she was voted for by 215,000 people, and received the weekly award of $500.

* * *

Loretta Young fell in love with the beautiful costumes that she wore in "Ramona," and couldn't bear to have them returned to the wardrobe room to be cut up and made over. So she bought them, had them remodeled slightly—and now has four new evening dresses.

* * *

At last Jack Oakie, that gay comedian of the screen, has his heart's desire—a master of ceremonies job on the air. It's odd that he hasn't been signed up before, for he is one of the few comedians who are as good on the air as they are on the screen — you've probably heard some of his guest performances: he was on with Bob Burns while Bing Crosby was in Honolulu. He got th idea for this new program from his work in "College Rhythm He's admitted that he'll have "guest professors" At [illegible]

Jack Oakie

son, Eddie Cantor, Burns and Allen and others.

ODDS AND ENDS — Talent Scouts for two major picture companies appeared at New York's Casino Montclair, (favored haunt of movie celebrities) recently to watch Ann Courtney—not knowing that she'd ...gned that morning with Warner Brothers . . . Gloria Swanson's going to do a stage play in New York; Irving Thalberg had planned to bring her back to the screen, just before his death, it's said . . . You'll see Barbara Stanwyck dancing in 20th Century Fox's "Banjo on My Knee", she used to do it for a living, starting in the "Follies" . . . This year those Saturday afternoon broadcasts of the Metropolitan Opera Company's performances will be sponsored by the Radio Corporation of America.

Bride-Training

SANTA BARBARA, Calif., — The bride-training is something more than teaching the art of home-making, the Santa Barbara State College has decided. A girl also should know how to make a living, as well as how to run a home.

The bride-training course at the college has been expanded to prepare graduates not only for marriage but for careers as teachers, dieticians, journalists, equipment specialists and clothing and furnishing specialists.

Miss Jean Krueger, head of the Home Economics department, gives six key qualities as requisities for success in home economics. She lists them cleanliness, appearance, initiative, ambition, personality and integrity.

In the Day's News

A newspaperman who works at the copy desk of one of the big dailies reports that one of the items passing through his hands from the Associated Press wire read in part, "A. W. Tillinghast, noted golf architect and P.G.A. consultant, will inspect each of the proposed sites, and left today for Starving Mother Park, Va., for his first assignment." Half an hour later a correction came hustling along: Make read 'left today for Hungry Mother Park, Va., (Not Ed.'

LOCAL AND GENERAL NEWS

Note J. A. Stewart's new ad in this issue.

Mrs. A. D. Samson has been confined to the house for several days with a cold, from which many people throughout the county are suffering.

Lobster traps used in the Canadian fisheries vary in number from year to year, but in 1935 they totalled almost 2,014,000. They are devices of lath and twine which offer the lobster a way in but not much of a way out.

Arthur Boyd, teller in the Royal Bank here, who spent his vacation of three weeks with relatives at Antigonish, returned to his duties on Monday. Roland Boak, of Halifax, who performed his duties in the Bank here during his absence. left for Middle Musquodboit, N.S., on Monday to act in a similar capacity in the Royal Bank in that village.

Capt. Hartling, of the S. S. Surf, spent a few days in Halifax the past week. Capt. Hartling is now a member of the Canso Town Council, filling out the unexpired term of a Councillor who had resigned.

D. D. Boyd, barrister, was on a professional visit to Arichat this week.

BORN.—At Aberdeen Hospital, New Glasgow, on the 9th inst., to Mr. and Mrs. Earl MacDonald (nee Myrtle Latimer) a son.

J. Emile Benoit was on a motor trip to Sydney over the week-end and brought back with him a fine new Pontiac car—1937. Emile can now give his taxi patrons a first-class service.

MAN WANTED to supply Rawleigh's Household Products to consumers. We train and help you. Good profits for hustlers. No experience necessary. Pleasant, profitable, dignified work. Write today, Rawleigh's, ML-56-53, Montreal, Canada.

Great flames of fire were seen issuing from the chimney of the federal public building on Monday evening, but burnt itself out in a few minutes. While it lasted the flying sparks endangered the other buildings in that vicinity, but happily no damage was done. The chimney in the public building is fire-proof and the roof is covered with fire-proof shingles.

Evangeline Martell, the 15-year-old daughter of Mr. and Mrs. S. G. Martell, of L'Ardoise, is a student is the "C" class at the O. L. A. Convent here. She made the following marks in four subjects in the recent half-yearly exams.: Geometry 97 1-2; Algebra 95; English 95; Latin 89.

Card of Thanks

The family of the late Mrs. T. J. Boudreau wish to extend their thanks and appreciation to their many relatives, friends and neighbors for their kind expressions of sympathy floral tributes and Mass cards extended during their recent sad bereavement in the loss of their beloved mother.

The recently organized Badminton Club has got away at a good start with a membership of nearly forty. The equipment has arrived and the county hall is the place wherein they practice three times a week. The officers of the Club are as follows: R. J. O'Leary, president; Mrs. (Dr.) B. A. LeBlanc, vice-president; Gus Comeau, secretary; J. J. Copland, treasurer. Executive: Mrs. J. M. Power, E. E. Bourinot.

John Latimer, we regret to state, is a patient in New Aberdeen Hospital, New Glasgow. Mr. Latimer's wife. daughter (Mrs. Earl MacDonald) and brother-in-law (W. D. Robertson. C. E.) are also patients in the same institution. We trust their condition is improving and that they will soon be restored to health and strength again. Their Arichat friends join us in this wish.

J. A. STEWART, Grand Anse

M. V. Nova II., Capt. George Schmeisser, was in port on Friday from Halifax and landed considerable freight. She sailed from here for Fourchu with dynamite for the Stirling Mine.

The biggest or only snowstorm this winter worthy of the name swept over this place on Wednesday, continuing throughout the day and night, and making the roads impassable for many hours until a squad of shovellers turned out to level down the banks and make the going fairly good again. The overland mail via MacIntyre's Lake was prevented from arriving on Wednesday and Thursday on account of the snow blockade and the S. S. Surf could not come down from Mulgrave on Wednesday on account of the blinding snowstorm, but made connection on Thursday. Our isolation was complete while this lasted and Kipling's "Our Lady of the Snows" was unpleasantly brought home to us.

WEST ARICHAT NEWS

The intermediate department of our school is closed for three weeks owing to the illness of the teacher, Mrs. Walter Duann.

Born—To Mr. and Mrs. Peter Terrio, a baby girl; also to Mr. and Mrs. Willie Rogers, a boy. Congratulations.

Colin Digdon has finished storing his supply of ice.

Mylae Benoit, who was confined to his bed for the past two weeks, is improving, we are glad to report.

Miss Clarisse LeBlanc left on Tuesday for Halifax.

Remi Babin left for Kempt Road where he has obtained employment for a few weeks.

North Isle Madame News

Mrs. Patsy Fougere arrived home on Saturday from St. Martha's Hospital, where she underwent a successful opdration and she speaks highly of the treatment given her while there.

Wm. Etienne, who has been laid up for several weeks, is well again, and will soon be attending to his daily chores.

The sawmill under the management of Leo Fougere has started operations.

Louis Langlois, principal of the D'Escousse school, was confined to his home for a few days with la grippe,

Poirierville Study Club met on Sunday evening with D'Escousse Study Club and matched their wits. It is reported that a local store will be rented and a co-operative store operated in same,

Nicholas and Frederick Poirier are busy cutting a carload of pit props to be shipped in early spring.

Gerald Sampson suffered a painful accident on Thursday when his shot gun accidentally discharged, hitting him in the knee. He left for St. Martha's Hospital.

Thomas Fougere is confined to his home through illness.

Emile Benoit was here recently with his new Pontiac. Pretty nice car, Emile.

[The above notes being received late, we can only publish a portion of the notes sent us.]

Death of Mrs. Robert Skinner

Mrs. Robert Skinner, a much loved woman of West Bay, died at her home there on Tuesday, 9th inst. She was 69 years of age. A faithful Christian, active in church and community, a friend of the poor and the sick, she will be much missed She was a daughter of the late Capt. John Walker, of Port Malcolm, and Annie (MacIntosh) Walker, of Walkerville, this county. Her husband, a daughter and two sons predeceased her: Besides several sisters and brothers she is survived by a daughter, Annie, two sons, Clarence and Chester, of West Bay. Rev. James P. Kaye conducted the funeral service, interment being in the family lot in Grantville cemetery.—COM.

Any Canadian housewife can obtain a free fish cookery booklet by writing to the Department of Fisheries, Ottawa. The cook book, available in either English or French, is called "Any Day a Fish Day."

NEWS FROM ST. PETERS

There occurred in Oban, February 10, the death of Mrs. John MacDonald, aged 96 years. A large crowd attended the funeral which was held at Oban. Mrs. MacDonald was predeceased by her husband. She is survived by two sons who live at home, Alex. and Dan., and two daughters, Mrs. Charles MacDonald, of River Dennis, and Mrs. Annie MacDonald, of Point Tupper; also a son and daughter, who live in the States.

The annual meeting of the Holy Name Society was held last Sunday evening, and the following were appointed officers for the coming year: President, Dan. Sampson; Vice-President, Charles Stone; Treasurer, John Alex. MacDonald; Secretary, J. N. MacDonald. An interesting feature of the meeting was a lecture by Angus D. Rankin, agricultural representative, who gave a keen analysis of conditions in this county and suggested remedial measures that could be adopted in bettering the condition of our farmers. He advocated the formation of stu[dy] clubs for all classes, and we are [in] hopes that his advice will be acte[d] upon.

News has been received of the birth of a son to Mr. and Mrs. E. MacDonald, of New Glasgow formerly of St. Peters. Their many friends join in extending congratulations.

Dan. Campbell, of Grand Greve, has left for Sydney, where he has obtained a position with the Three Star Service Station on George St.

John L. MacNeil, mail courier between St. Peters and Irish Cove, sustained an injury resulting in a broken rib when doing some repairs to his car several days ago, and will be incapacitated for a couple of weeks.

Harry Cotton, who is employed in Montreal, is visiting his parents. Mr. and Mrs. Frank Cotton.

John Ferguson, employed with the Royal Bank at Sydney, is visiting his parents,

Among visitors to town this week were Wylie Smith, Sheriff of Guysborough county, Ernest Gourley, of Canada Packers, and D. K. MacLeod, of Provincial Oils, Sydney.

Winter Time Table

Canso, Arichat, Mulgrave Steamship Service

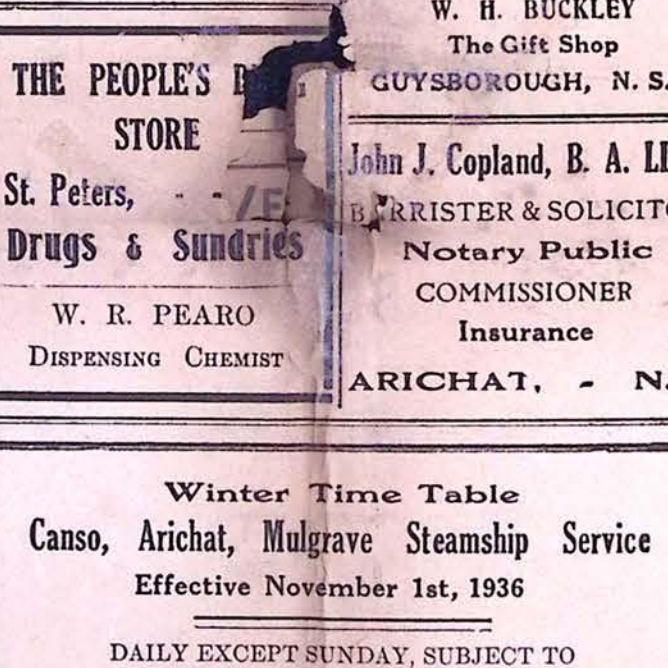

Effective November 1st, 1936

DAILY EXCEPT SUNDAY, SUBJECT TO WEATHER CONDITIONS.

LEAVE CANSO AT 7 A. M., CALLING AT ARICHAT AND CONNECTING AT MULGRAVE WITH MORNING EXPRESS FROM SYDNEY.

LEAVE MULGRAVE AT NOON FOR ARICHAT AND CANSO.

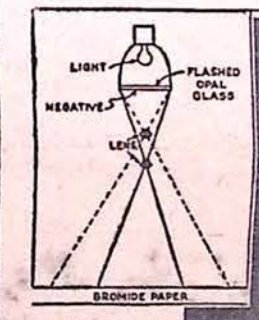

Passengers and Freight via "SURF" to and from Petit de Grat and West Arichat will be transported by BUS and MOTOR TRUCK connecting with Steamer at Arichat, morning and evening, free of charge.

Department of Fisheries, Ottawa

The SNAPSHOT GUILD

Printing and Enlarging Your Own

Principle of an enlarger: the farther the lens is from the paper the greater the enlargement.

Enlargements bring out interesting detail. Light and shadow tones may be improved in the process.

ALTHOUGH relatively few camera owners develop and print their own negatives, a greater number now do their own printing and enlarging. They find that in this part of picture-making there is a wide range of opportunity to exercise their artistic talents and produce prints suiting their own tastes and fancies.

Developing negatives—what with daylight developing in film tanks and dependable formulae in darkrooms—has in these days become largely a "time and temperature" process practically certain, if the exposure was correct, to produce good negatives. Printing a negative, developing a print and making an enlargement are very much "something else again," not that they are formidable tasks, but decidedly more choosy. Skill and judgment play a large part.

There is considerable choice, for one thing, in the kind of photographic paper on which the negative may be printed, depending upon the degree of contrast the paper will give to the dark and light portions of the negative, or whether or not soft effects are desired. Some negatives show extreme contrast in lights and shadows; some have average contrast; some, because of faulty exposure, are weak, thin and flat; some, extremely so. The selection of paper best suited to the type of negative and the kind of picture, plus proper exposure in printing, often makes the difference between a good and a bad picture.

Again, there is a choice of surfaces in paper, such as velvet, glossy, semi-gloss, according to taste. The highly glossy paper, for example, is best suited for a negative filled with detail. Again, re-development solutions are available for giving a print a different tone, such as sepia for an autumn scene.

The amateur who does his own printing has the opportunity, too, of masking portions of the negative to suit his own artistic judgment. He may give a picture a more balanced composition or eliminate undesirable details on the sides, top, or bottom. In a cloudless picture he may insert clouds by "printing in" from another negative, and he may amuse himself by producing trick pictures by printing from two or more negatives.

Equipped with an enlarger, the amateur has still greater opportunity to improve his pictures and satisfy his own tastes. This is an apparatus with which a large positive image is obtained by permitting rays of light to pass through the negative, then through a lens and focus on a sheet of sensitive bromide paper.

With an enlarger the amateur may "blow up" a picture to several times the area of the negative. This may result in the transformation of a very ordinary looking picture into an extraordinarily impressive one, because the enlarging often reveals details of interest or beauty not visible in the small "contact" print. He may select only portions of a negative to enlarge — any portion — by masking light from the remaining area; he may even make two or three pictures from one negative. There are ways, too, of controlling the shadow tones of different parts of a picture, thereby greatly enhancing its artistic value.

All these possibilities are worth knowing, even if you do leave their execution to your photo finisher, because you can give him intelligent instructions as to what you prefer in the finishing of your snapshots.

CORRECTION

Through an error on the part of the printer, the price in the Salada Green Tea Advertisement which appeared recently in this paper was shown as 38c per half lb. instead of 30c per half lb.

"SALADA" TEA

STAR RUBY

By Louise Jerrold

Synopsis of Story so Far:—

Albertine Tevans, alone in the world, works in a departmental store. She falls in love with Dennis Maxwell, young jewelry salesman, but is worried by a rumor that he has got into some sort of trouble with his firm. Out of a clear sky, her rich great-Aunt Celia, whom she has never seen, invites her for a visit. The night before she is to leave, Dennis acts very mysteriously, then thrusts a star ruby into her hand and bolts. She later hears that he took a plane to New York. The next day, when she reaches the little town near which her aunt lives, she is met at the station by her aunt's chauffeur — sinister-looking man in dark glasses.

CHAPTER IV.

The car crossed the railroad tracks, rattled noisily over a bridge and followed a course over a series of small hills that reminded Albertine of a roller coaster.

The chauffeur was sitting very erect seemingly intent on the rough road before him, but Albertine had a creepy feeling that, behind his dark glasses, he was watching her in the little rear-view mirror.

It was, she found, less than a thirty-minute drive from the station to her aunt's estate. This was surrounded by a high wall, and there were impressive iron gates, which the chauffeur unlocked and then locked again when they had passed through. A driveway made a graceful ascent between beds of flowers and sloping lawns.

As they neared the house, a great castle-like pile of grey stone, Albertine forgot her feeling of fear. She was excited, thrilled now.

The car stopped and she saw, on the wide steps of the house, a tiny old lady with snow-white hair. Albertine did not wait for the chauffeur to open the door or her. She flung it open herself, leaped out, and flew into the arms outstretched to welcome her.

"Albert's little girl! Albert's," Aunt Celia was saying.

"I—I hope you'll like me," Albertine's voice trembled. After all, there was nothing overpowering about Aunt Celia. She was simply a lonely old lady, now weeping quite openly.

The chauffeur, with Albertine's suitcase, stood awaiting instructions.

"Take it to the blue room, Bates," Aunt Celia said, a bit sharply.

She stumbled as she started up the steps with her niece.

"I'm near-sighed," she explained, "but I won't wear glasses. I hate them! Bates makes me so nervous with his."

"Does he wear those awful dark glasses all the time?"

Aunt Celia nodded. "Some temporary eye trouble. But I needed a new houseman and he had such excellent references. I brought him with me from New York."

Albertine stopped short. "From New York? Oh, yes—the policeman at the depot said——"

"Policeman? Oh, you mean Bob Fletcher, of the State Police."

"He said," Albertine continued, "that you have some other guests. If I'd known, I could have come later."

"Poppycock! I invited them to come back from New York with me partly to help entertain you. They are charming young Russians—Count Michael Loupakoff and his sister, Yelena. We'll go into the drawing room now so that you can meet them."

The drawing room was a little overwhelming. It was large and high-ceiliaged, with richly colored Persian rugs, elaborately carved antique furniture, and enormous mirrors in heavy gold frames.

At the far end of the room, a man was softly playing a lovely old concert-grand piano. His smooth black head was bent so that Albertine could not see his face. Nearby, stood a breath-taking beautiful young woman, who lifted languorous brown eyes and smiled faintly as Albertine and her aunt approached. She said something in an undertone to the man who instantly dropped his hands from the keyboard, and rose.

"Countess Yelena and Count Michael, may I present my great-niece?" Aunt Celia said, with old-fashioned formality.

The Count, whom Albertine guessed to be around thirty, bowed low over her hand and kissed it. Countess Yelena smiled graciously enough, but her eyes were cold.

"So this," she said in a throaty voice, "is Albertine, of whom we have heard so much!" There was a slight foreign accent to her words. "Lovely, isn't she, Michael?"

"Very lovely." The Count was handsome, with dark eyes and wisp of a mustache.

It was exactly like a movie, Albertine thought.

"So warm on the train," she heard herself saying. "And I'm awfully rumpled. I think I'd better go to my room and change."

Yelena turned to Aunt Celia. "Let me go with her. Stairs are so bad for your heart."

The two girls passed Bates in the hall. He had exchanged his chauffeur's coat for one of white linen, but he still wore the colored glasses.

The Countess sighed. "He is such a perfect servant. I was loath to let him go. He was with us for the first two years we were in America. But with times as they are——" She made a vague, fluttering gesture.

Albertine said, "I can't get used to those colored glasses of his. They are so queer. But then, everything is so queer."

"What is queer?" Yelena asked quickly.

"Visiting Aunt Celia—and meeting you. Would—would I be impertinent if I said that you're more beautiful than anyone I've ever seen?"

The Countess' laugh was low and musical. "Of course not. I should bless you for the compliment, because you're such a child, you make me feel very old."

They had reached the door of the blue room. Albertine flushed as she saw the Countess glance at the shabby suitcase, which Bates had placed on a luggage rack.

"I don't know whether Aunt Celia told you," she said, lifting her chin a trifle. "But I work for my living. I'm not apologizing—I only want you to know why I haven't got a lot of pretty things."

"The American girl is so clever," Yelena drawled. "And so pretty. Michael, my brother, is very susceptible to beauty."

Was that a warning, Albertine wondered, when the Countess had gone.

When she had changed, she slipped downstairs again, and found the others still in the drawing room. Yelena, who was moving restlessly about the room, turned as Albertine entered.

"Ah, Albertine is with us again," and Albertine saw her exchange a swift look with Michael over Aunt Celia's head.

Michael rose and came to meet her. "I have been waiting to sing to you. One is permitted to say — certain things—when one's words are set to music."

He seated her near the piano. Then softly, in Russian, he began a song with a poignantly sweet melody.

When he had finished, Yelena said, a trifle sharply, "Miss Tevans is waiting to hear her favorite — the one about the little red boots."

Michael laughed. "My sister," he told Albertine, "doesn't care for 'The Kiss'—the one I just sang. It brings back memories of an old love affair, I imagine."

Yelena whirled, he eye flashing.

"As a matter of fact, the last time heard it, you——"

"Yes, yes," Michael interrupted placatingly. "I remember. Now for our hostess' favorite."

Albertine felt embarrassed. She glanced at Aunt Celia, but the old lady seemed serenely unconscious of the tension in the air.

(To be Continued.)

Ontario Town Blames It On Leap Year

KIRKLAND LAKE, Ont.—Maybe it was the leap year influence that made marriage figures the only section of the vital statistics department to show increase last year over 1935. Twenty-three more couples were married to reach a total of 236. Natural increase in population was 391 against 409 in 1935.

Woman's World

By Mair M. Morgan

A FLUFFY CAKE

At this season of the year, everyone is just a little tired of the richness of holiday food. What is left of the Christmas cake can be carefully stored and used at another date, but now is the time to serve something a little less heavy and sweet. A light, fluffy, sponge cake is just the thing. For the bridge, tea, for Sunday night suppers with ice cream or for practically any occasion, this cake will be a credit to the hostess and a joy to the guests.

Sponge cakes depend on air for their fluffy, light perfection. The air may be beaten into the egg whites or yolks, or sifted into the flour and held there by the light, careful folding of the ingredients. Of course, the ingredients must be the best and particularly the flour. Specially milled, soft winter wheat flour which has been sifted and re-sifted till it is as fine as the millers can make it, is the first step towards cake successes.

A sponge cake is not necessarily expensive. Even if only one or two eggs are used—it can taste like a luxury cake when made wtih the right kind of flour.

ORANGE CAKE

(P. 20—Latest Cake Secrets)

1¼ cups sifted cake flour.
1¼ teaspoons baking powder.
¼ teaspoon salt.
1 cup sugar.
1 tablespoon grated orange rind.
2 eggs and 1 egg yolk.
¼ cup orange juice.
¼ cup water.

Sift flour once, measure, add baking powder and salt, and sift together three times. Add ½ cup sugar and orange rind to eggs, and beat with rotary egg beater until thick and lemon-colored; add remaining sugar gradually, beating very thoroughly; then orange juice and water. Add flour gradually, beating with rotary egg beater until smooth. Turn into greased tube pan and bake in moderate oven (350 D. F.) 55 minutes, or until done. Remove from oven and invert pan one hour until cold.

EMERGENCY SHELF

Home-made pickles and preserves, olives, candied fruits, meats, soups and fish go a long way in helping the woman who has to entertain, be ready to meet emergencies graciously. The popular home is always the one in which the guests do not feel they are disrupting the entire household by their presence, the one in which everything appears to run easily and without effort.

The modern emergency shelf is different from that of our mother's because it is not a supply of seldom-used provisions for special occasions only. Although it may include a few specials, it is, for the most part, simply a generous supply of the semi-perishable staples which are always on hand for family use.

In order to help your meals on their merry way to satisfying the purse, the appetite, as well as the body needs, you will find it well worth your while to follow these recipes and use them often:

BARBECUED BEEF

One and a half pounds of round steak or braising beef (three-quarters of an inch thick); salt and pepper and flour.

Method: Pound the meat thoroughly with a wooden beater. Rub with salt and pepper and flour well on both sides. Brown quickly on both sides in a small amount of shortening. Add following sauce:

Sauce: One and one-half cups hot water, 1 tablespoon butter, ¼ teaspoon tobasco sauce, ½ cup tomato catsup, 1 tablespoon Worcestershire Sauce, 1 lemon, juice.

Method: Bring to a boil and pour over the meat. Cover closely and cook slowly over fire for two hours. Garnish with slices of sour pickle and lightly sauted green pepper slices.

MUTTON ROWLETTE

One and a half slice mutton (forequarter), mustard, 2 cups of bread crumbs, ¼ cup butter or drippings, 2-3 cup hot water, 1 teaspoon poultry seasoning, 1 teaspoon salt, ¼ teaspoon pepper.

Method: Rub meat with mustard, salt and pepper to taste. Prepare a dressing of the remaining ingredients and place over the meat. Roll meat and dressing and tie or skewer fast. Sprinkle with salt and pepper and dredge with flour. Brown all over in hot shortening. Make a brown gravy by adding two tablespoons of flour and two cups hot water. Pour over meat roll and simmer on top of stove or in a moderate oven, 350 degrees F., until very tender—about three hours.

ORANGE PRUNE SALAD

18-24 prunes, cooked, 1 pkg. cream cheese, 1 tablespoon nuts, chopped, 2 tablespoons top milk, salt and paprika, 2 oranges.

Method: Remove stones from the prunes. Mix cheese, nuts, salt, milk and seasonings and stuff the prunes. Arrange attractively on a lettuce leaf with slices or sections of orange. Serve with a tasty French dressing. Garnish with paprika and serve icy cold.

BAKED BEAN CROQUETTES

Two cups baked beans, salt and pepper, minced onion.

Method: Drain and mash beans into a smooth paste. Season with salt, pepper, onion. Shape into cutlets or croquettes, dip in beaten egg and crumbs and deep fry in shortening at 380 D. F. Serve with tomato catsup.

Serve croquettes with a baked potato. A crisp green salad will complete the meal.

If You're Told to "Alkalize"

Try This Remarkable "Phillips" Way Thousands are Adopting

On every side today people are being urged to *alkalize* their stomach. And thus ease symptoms of "acid indigestion," nausea and stomach upsets.

To gain *quick* alkalization, just do this: Take two teaspoons of PHILLIPS' MILK OF MAGNESIA 30 minutes after eating. OR — take two Phillips' Milk of Magnesia *Tablets*, which have the same antacid effect.

Relief comes almost at once — usually in a few minutes. Nausea, "gas" — fullness after eating and "acid indigestion" pains leave. You feel like a new person.

Try this way. You'll be surprised at results. Get either the liquid "Phillips" or the remarkable, *new* Phillips' Milk of Magnesia Tablets. Delightful to take and easy to carry with you. Only 25¢ a box at all drug stores.

ALSO IN TABLET FORM:
Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Another Liner Is Contemplated

Cunard-White Star Plans 30,000-Ton Ship

GLASGOW — The Cunard White Star Steamship Line announced last week a contract for construction of another passenger liner for the Atlantic trade is under negotiation. The new vessel will have a tonnage of 30,000 to 40,000 and a speed of 22 or 23 knots. She will be approximately half as large as the Queen Mary.

The keel of "No. 552," sister ship of the Queen Mary, now under construction at the John Brown Company shipyards, has been almost completed, it was announced. When finished, the liner is expected to be the world's largest with a total tonnage of almost 90,000.

Shipyard workers' hopes for the New Year are centred upon the possibility the same company may soon obtain a £7,500,000 ($37,500,000) contract for the construction of one of Britain's new battleships. Some 1,000 are already employed on the "552," and the number is increasing as the work progresses.

It is estimated that out of every ton of coal some 20 pounds are dust, and in the average coal cellar this dust accumulates at the rate of eight pounds per square yard every month.

FINE FOR KIDNEY AND BLADDER WEAKNESS

STOP GETTING UP NIGHTS
LOOK AND FEEL YOUNGER

Keep your kidneys free from waste matter, poisons and acid, and put healthy activity into kidneys and bladder and you'll live a healthier, happier and longer life.

One most efficient and harmless way to do this is to get from your druggist a 40-cent box of Gold Medal Haarlem Oil Capsules and take them as directed—the swift results will surprise you.

Besides getting up nights, some symptoms of kidney trouble are backache, moist palms, leg cramps, and puffy eyes. If you want real results, be sure to get GOLD MEDAL —the original and genuine—a grand kidney stimulant and diuretic—right from Haarlem in Holland. Give your kidneys a good cleaning once in a while.

To Ease a Headache Fast

Get Real Quick-Acting, Quick-Dissolving "ASPIRIN"

See How "ASPIRIN" Tablets Work

In 2 seconds by stop watch, an "Aspirin" tablet starts to disintegrate and go to work. Drop an "Aspirin" tablet into a glass of water. By the time it hits the bottom of the glass it is disintegrating. What happens in this glass . . . happens in your stomach.

For QUICK Relief

If you suffer from headaches what you want is quick relief.

"Aspirin" tablets give quick relief, for one reason, because they dissolve or disintegrate almost instantly they touch moisture. (Note illustration above.)

Hence—when you take an "Aspirin" tablet it starts to dissolve almost as quickly as you swallow it. And thus is ready to start working almost instantly . . . headaches, neuralgia and neuritis pains start easing almost at once.

"Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Try it. You'll say it's marvelous.

Demand and Get—

ASPIRIN TRADE-MARK REG.

LOOK FOR THE BAYER CROSS

MINING FLASHES

The No. 1 diamond drill hole at the Kenora property of Kenecho Gold Mines has reached a depth of 520 feet, and has intersected 16 feet of mineralization, including three feet of quartz believed to be a new vein, according to a wire received at the head office from Chas. Young, managing director. The quartz contains pyrite and fine sulphides, while the wall rock is also mineralized for some distance on either side, it is stated.

Ilava Cadillac Gold Mines is preparing to speed up work on its property located 1½ miles south and slightly east of the O'Brien in Cadillac Township, Quebec, officials report. At present, the company is building a permanent set of camps and a large crew of men will be put to work to open up a shear zone which was discovered some time ago, which consists of a sheared porphyry with narrow blue quartz veins. The transmission line from Northern Canada Power is about one mile distant from the northern boundary of the property and the property is less than a mile from the new C.N.R. line from Senneterre to Amos.

Production at Shawkey Gold Mining Company for December was the best month in the mine's history, with output valued at $41,000, according to V. M. Ryan, mine manager. For the first ten months of 1936 output totalled $267,558, with $10,000 to tailings and a general overall extraction of 96.5%. There is a considerable tie-up in the mill circuit due to the unusually large percentage of free gold in the ore. Drilling continues from underground, with success having been met with, while a programme of drilling on surface is to be carried on in an effort to disclose the extensions of the veins encountered on an adjoining property to the west. Drilling is also to be done to establish the No. 1 vein at a depth of 250 feet below the 575-foot level.

In a communication to Empress Consolidated Gold Mines the General Engineering Company reports that in accordance with the agreement between the two companies, the latter undertook to act as technical superintendent of the property. Correlation of all available sampling, drilling and assay data has been the primary objective and this work has been actively prosecuted under their direction since Dec. 15th. Most of the assaying since Dec. 15th has been of sections of drill core and work is proceeding of sampling the adit, surface exposures, and additional drill core. R. W. Howe, consulting engineer of the company, reports rapid progress being made in re-check work. Decision to re-samply all work to date has made it necessary to run an unusually large number of assays. The assay plant is being operated two shifts a day. Two drills are engaged in a series recommended by engineers in the locality of Trench E, west of the lower adit, and Trench F east of the adit, in both of which considerable free gold was exposed in previous work.

Doreva Gold Mines has made important additions to its already large holdings in Bousquet Township, Quebec, during the last few days. The acquisitions comprise the south half of the Vaughan claims lying to the north; claims owned by Engineers Exploration the east; the Gravelle group of claims adjoining the Engineers Exploration on the north, and the Ash group adjoining the Gravelle to the east. The company now holds a total contiguous area in excess of 4,200 acres extending a great distance along the strike of the Cadillac ore zone. Development is being advanced with 2 drills and surface crews with portable compressors engaged in operations. The work is a formulation of a definite program of underground development after determining the best location with a working shaft. A prospect shaft is now being sunk at one of the important showings. A crew of 42 men are employed.

Underground work on the 200-foot level at the Sturgeon River property of Brengold Mines indicates a possibility that No. 2 and No. 7 veins will intersect at a point below the 200-foot level, officials report. To explore the possibilities at greater depth as indicated by underground work already completed, as rapidly as possible, a diamond drill contract has been let and the drills will be working underground within the next few days. A very comprehensive underground diamond drill program has been laid out and the area to the south and west of the present underground workings will also be explored by a number of long flat holes. Lateral work continues on the 100 and 200-foot levels, with veins Nos. 2 and 7 being opened on the former horizon. Drifting on No. 2 vein is also underway on the 200-foot level, while a crosscut is being driven to the southwest to explore the downward continuation of No. 7 vein.

The Machine

"It is said that machinery manufactures unemployment, and the machine has been cursed as something which takes work from men. This is a superficial point of view which cannot be justified except in a very narrow segment of production. If the machine creates unemployment in one industry, it causes other industries to arise. It puts at the disposition of the masses articles formerly reserved to the aristocracy. It gives birth to new needs, new trades, and new opportunities for profit. Did the linotype create unemployment in the printing industry? For a few months, perhaps. After that time, it inspired periodicals by the hundreds and books by the thousand. The machine killed the stagecoach, but it gave birth to the automobile.

"It is impossible to demonstrate whether the loss or the gain is the greater. In very truth, the only irrefutable proof would be to show that unemployment made its appearance with the machine. But that is impossible. There were unemployed before the eighteenth century. The only difference is that they were called the poor, or beggars, or vagabonds. It will be sufficient to consult the arsenal of laws against begging in France and England to realize that unemployment is a heredity plague, far antedating the utilization of steam or coal."—Je Sui. Partout, Paris, France.

London, Eng.—Lloyds decided recently to exclude war risks from policies covering property in any part of the world, except Canada and the United States.

War insurance was stopped some time ago in the United Kingdom and Ireland.

Junior Farmers Visit International Harvester Plant

When prize-winning boys and girls, 75 in number, members of Junior Farm Clubs, representing the different provinces, visited Hamilton a short time ago, one of the most interesting interludes was a trip to the Hamilton works of the International Harvester Company and the picture shown above was taken after a trip through the large plant. F. M. Morton, vice-president of the Canadian Council on Girls' and Boys' work, received the group and conducted them on a trip through the farm implement factory and binder mill. Mr. Morton is seen in the centre of the second row. At noon there was a tasty luncheon served, at which J. G. Rayner, president of the Canadian Council, extended a generous word of praise to the Harvester company for its courtesy and contribution to the pleasant associations to be carried away by each visitor as a life-time memory of the trip. Among other tributes, Mr. Rayner explained that a part of the funds necessary to carry on club work accrued from the proceeds of a gift made years ago by the International Harvester Company. Among those in the group are the following Ontario Club Members:— W. W. Werry, Hampton, Ont.; G. F. Robson, Denfield, Ont.; Frank J. Giffen, Creemore, Ont.; Mac Walker, Campbellcroft, Ont.; Floyd Metcalf, Bowmanville, Ont.; Beverley Shouldice, Shallow Lake, Ont.; Carrol Nicholls, Port Hope, Ont.; Arthur Banting, Alliston, Ont.

SCOUTING Here There Everywhere

A brother to every other Scout without regard to race or creed

King George VI. has indicated readiness to become, like his father, the Patron of the Boy Scouts of the Empire.

• • •

To mark the King's Coronation, and as the Dominion's part in a project launched by Lord Baden-Powell, Canadian Boy Scouts qualifying as King's Scouts before Dominion Day this year will be awarded a special Coronation King's Scout certificate.

• • •

Like King George V., the new King has associated himself with Scouting in various ways. He attended the great London gathering of Wolf Cubs held at Hyde Park in 1921, the Imperial Jamboree at Wembley in 1924 and the London Cup "Palava" of 1926.

• • •

A photograph of the new King, when the Duke of York, shows him in full Scout kit and wearing the Silver Wolf, Scouting's highest honorary award. The decoration was presented by Lord Baden-Powell in 1926, in recognition of the Prince's service to the Movement as President of the Boy Scouts Association for Berkshire and of London.

His ideas on the responsibilities of citizenship were thus outlined to a gathering of youth by the King when Duke of York and President of the London Boy Scouts Association:

"I want you to realize that you have a great responsibility to take up with the duties of citizenship that lie before you. You may think these problems have nothing to do with you; that it is other people who have them to solve. But don't believe that. It is only when every man and woman realize their responsibilities to their country in general that a happy country can result, because not one of us is put into the world for himself alone. Make yourself effective in your job, and do it with all your might, because dishonest and ineffective work is wrong to your fellows and to your country. Therefore we must all do the best we can."

• • •

Prince Gustaf Adolf of Sweden will be a personal page of the contingent of Boy Scouts representing that country next summer at the 5th International Scout Jamboree to be held in Holland. His staff of assistants will include Count Folke Bernadotte.

Darling Wife;
Dear Mary;
Hello Mame;
Pay to the order of Mrs. Mary S. Doe.

Read it or Not:—

If you want to peel onions without crying—place a steel needle between your teeth, with the sharp end on the outside and bite on it.

Naomi — I can't see what in the world she wants to marry that man Brown for. He has a wooden leg, a glass eye, false teeth and wears a wig.

Jimmie—It must be the feminine instinct that makes them hanker after remnants.

To a Bride—The groom may be the light of your life, but wait until your light starts going out.

If you would acquire a profound knowledge of men . . . study women.

Grace—I wonder why so many marriages are failures?

Frank— It must be because so many inexperienced people go into it.

Breakfast

Little bits of sawdust,
Little bits of wood,
Flavored scientifically
Makes the breakfast food.

A poor lad is strengthened and disciplined by his obstacles.

Rub stones together and they spark.
Rub brains together and they sparkle.

There is consolation in the thought that we are not likely, when we arrive in Heaven, to be taxed for the purpose of keeping the golden streets in repair.

If it is sinful to have wicked thoughts of any kind, then Heaven isn't going to be much of a population centre.

Accident Prevention

More protective equipment is being issued to Britain's pitmen, states the Safety in Mines Research Board. The result is a decline in colliery accident rates, particularly those relative to head injuries. In 1933, miners in one South Wales pit, unprotected by hats, suffered from head wounds at the rate of 0.79 per 1,000 man shifts worked. But last year when eighty-five per cent of the men that worked underground wore hats, the rate dropped to 0.075 per 1,000 man shifts. Altogether 140,000 of these hard, strongly-built hats were supplied to miners in 1935.

Other accident risks have been minimized by the adoption of safety boots with reinforced toes and instep. More conveyor-belt workers are now wearing gloves. But it is insisted the glove habit, once adopted, should not suddenly be discarded, hands becoming soft under its influence. Knee and elbow pads proved successful in forestalling beat-knee and beat-elbow. Of non-fatal accidents, eye injuries exact the severest toll. Here goggles are a reliable precaution.

At Steetley Colliery, where research workers tested an experimental lighting installation at the coal face, greater safety, it was found, occurred with increased illumination. Unfortunately, the Board's invaluable investigations are hampered by lack of funds.

"Passing on what we are to those we love is the greatest responsibility and the greatest joy of fatherhood."
—Harold Bell Wright.

"Governmental extravagance leads to bureaucracy and bureaucracy leads to governmental extravagance. Each one feeds upon the other, and both of them feed upon the people."
—Colonel Frank Knox.

"When Asia and Europe look toward the Americas their eyes look as though they had bayonets in them."

NOTE AND COMMENT

A contemporary whose editor has recently figured in the divorce courts claims that "if love is blind, marriage is a good eye tonic." But the trouble comes when marriage proves an "I" tonic; when each partner wants his or her own way instead of being willing to compromise.

—

One speaker has been telling an audience it is axiomatic that a great part of the tax rate is uncontrollable. That's just the trouble. Municipal authorities go after the tax rate with axioms instead of with axes,

—

"At my earliest convenience" is just one more date that never arrives, as we have often found out to our cost.

—

A ghost who walks-heads-on into approaching cars is reported busy in Pictou county. Perhaps the poor thing thinks it will get a shade the best of the argument.

—

We have just heard of a man who accumulates assets by liabilities.

—

A foot clinic for the deserving poor has been established in St. John, N. B. This is very different from the old days in which the only "foot clinic" the poor were likely to get was what is known as "the boot".

—

A sled on which two girls were riding passed under a moving truck without touching it. Teere was also a case recently where an automobile threw a train off the track and no one was hurt. An optimist, however, is a sledder who thinks that the first of these incidents is likely to be repeated, or a motorist who thinks that he can bang into a train and send it into the ditch without damage to himself.

—

"Alberta chickens are coming home to roost," says an exchange. Maybe. But they don't seem to be laying any dividend eggs.

—

It is said that the houses of the future will be of glass. If the glass is transparent, it will be a case of of "People who live in glass houses shouldn't throw parties."

—

A correspondent wants to know which sex is more peaceful? Well, two men can live in the same house and cook on the same stove.

—

It looks like the government at Ottawa has lots of money to spend on the Coronation—Two Hundred Thousand Dollars. In the Record's opinion this great amouut of money could be put to a much better use. What about the unemployed and the many in need of proper nourishment to sustain body and soul? The sum voted for such a purpose will not receive the whole-hearted approval of the Canadian people.

People usually accept a native's opinion of his own province. If the native says it is no good, then the stranger who visits us is liable to accept the statement as the truth. The difficulty with the Maritimes that we are suffering from an eriority complex, which we seem to love to parade as though it was something to be proud of.

—

When a newspaper suggests that all the business places in its constituency ought to be represented in its advertising columns it takes the risk of having its motives misjudged by its readers. The publisher naturally has a self-interest in the matter, but if he is possessed of the proper spirit—and most of them are—he is actuated as well by a broader and more far-reaching desire. The local newspaper reflects to a far greater degree than does any other institution the life of the county that it serves.

Those who read its columns estimate the advantages which a county possesses and the public spirit and enterprise of its citizens most naturally by what is contained therein. If it is a desirable place in which to reside it ought to possess the necessary facilities for proper living. That there are some good modern stores in all lines of merchandising, well qualified professional men and artisans, he has no way of realizing other than the appearance of their announcements in the pages of the home paper. That very often what people read along this line in the home newspaper guides a decision is amply testified by the frequent requests that come from people seeking a home for sample copies of the Richmond County Record.

There are two other very good reasons why all those who do business should join in advertising the qualifications of the place that gives them a living. It is manifestly unfair for a group of men who make no contribution in the matter of publicity to expect to reap advantage from the outlay made by other business men. That is not "playing the game".

Aside from the fact generally conceded that newspaper advertising is the best means of publicity that can be used by an efficient bnsiness man, these are some of the considerations that are worth taking into account.

"Heaven Doesn't Matter"

Under the caption "Heaven Doesn't Matter", Channing Pollock contributes thoughtful article to The North American Review.

Here is a typical paragraph: "Hu Shih, father of Chinese Renaissance, wrote: "As I reviewed the life of my dead mother, whose activities had never gone beyond the trivial details of the home but whose influence could be clearly seen on the faces of those men and women who came to mourn her death, and as I recalled the lasting effect of her life on myself, I came to the conviction that everything is immortal, Everything that we are, everything that we do, everything that we say is immortal in the sense that it has its effect somewhere in the world, and that effect in turn will have its results somewhere else, and the thing goes on infinite time and space. A man is what he thinks and everyone who has influenced him—from Socrates, Plato and Confucius down to his parish preacher and his nursery governess—lives in him".

The closing paragraph of the article expresses a philosopyy which should have wider acceptance. You may think it heterodox but then you may agree with me that even to-day many of our conceptions of the next world are crude, almost if not quite as crude as were the conceptions of men many thousands of years ago. Is your idea of heaven to sit around and play a harp? Maybe you don't like music in which case it would be punishment for you to produce sweet or any other kind of sounds.

But here's the closing paragraph of the Pollock article:—

"My heaven is everywhere about us. If you need to believe in the other kind, don't let me dissuade you. It isn't that I don't believe; only that, for me, that other heaven doesn't matter. Not now, anyway. I want to go on with my work, and leave the outcome to God."

Buck That

Cough or Cold

With Buckley's

It costs only a few cents to knock out a cough or cold with BUCKLEY'S MIXTURE, because Buckley's is so supremely good that only a few doses are needed to subdue the toughest cough or cold. And Buckley's can be diluted with three times its volume of water making it go still further.

Will not upset your stomach. Just safe, sure, instant relief from coughs, colds, 'flu or bronchitis. Play safe. Refuse substitutes. Buckley's is sold everywhere.

"Proud" In Scotland

A rather significant aspect of the accession of King George VI and the Queen Consort Elizabeth is the sentimental effect that it will have in Scotland. The fact that the Queen is a descendant of an ancient Scottish family should bind the northern part of the United Kingdom to the Monarchy. A good deal of humor has clustered around the remark of an old Scottish woman when she heard that the Princess Louise, the daughter of Queen Victoria, had married the Marquis of Lorne, a scion of the illustrious House of Argyll. "The Queen will be a proud woman this day," she said, "with her daughter marrying an Argyll."—Brantford Expositor.

Safety on the Roads

More strict regulations governing the issuance of drivers' permits, stiffer penalties for violations of traffic laws and stern treatment of those convicted of driving while under the influence of alcoholic beverages would do more to reduce motor accidents than any speed-limit law could do.— The St. Thomas Times-Journal.

She Began Early

A feminine stenographer, employed by a United States railway, has just been retired after 47 years of continuous service and that must be regarded as a pretty long spell.—Brantford Expositor.

A Good Sign

The Royal Canadian Mounted Police can be depended on to know what they are talking about when discussing bad men, what they do and with what weapons. It is therefore all the more encouraging that they have words of praise for the recent legislation requiring the registration of firearms of the revolver type with the police authorities. Certain crimes have been either solved or their solution has been materially helped by the fact that the revolver or pistol used could be traced through records.—Montreal Star.

Wheat Picture Improves

The world's wheat picture grows steadily better for Canada. At the end of 1932 the world's surplus was 625 million bushels; at the end of 1934 it was 375 million bushels; at the end of 1937 (according to estimates) it will be but 125 million bushels. This is what is behind the recent sensational rise in wheat prices, which mean so much for Canada.—Ottawa Journal.

Learn of the North

The year 1936 has been a noteworthy one for Northern Ontario in that an exceptionally large number of Cabinet members and other government luminaries have seen fit to pay this section of the province a visit.

There was a time when it was a rarity indeed for a Minister of the government to venture into the North country, but all that is now passed. During the year just concluding, scarcely a month passed when some important government official did not visit the North. The latest visitor in this respect was Hon. Norman Rogers, Dominion Minister of Labor.—The North Bay Nugget.

A Good Bet

Lloyd's will accept war risks in Canada. In other words, Lloyd's will bet that Canada does not become involved in war. What Canadian would bet the other way?—Toronto Globe and Mail.

More Farms in West

Here is some interesting and rather astonishing news from the West. Despite the drought, the depression and a cessation of immigration during the past five years, there has been an increase of nearly 12,400 farms in the Prairie Provinces, bringing the total up to 300,462 in 1936 compared with 288,079 in 1931.—London Free Press.

"A Terrific Gal"

A terrific gale has been causing damage in England, and no compositor has yet had the temerity to set it up "a terrific gal."— Toronto Star.

The Nightshirt's Appeal

The Charlottetown Guardian points out one peculiarity of the nightshirt which should appeal to every Scottish heart. It is a one-piece item at the laundry, while pyjamas "is" two. Or should we say "are"?

Historic researches conducted by the International Night Shirt Club have disclosed evidence that some of the greatest men in history from Nero to Napoleon, and from Gladstone to Lincoln, wore nightshirts.—St. Mary's Journal-Argus.

Thornton Memorials

The late Sir Henry Thornton could have wished no finer monument than the respect and honor in which his memory is now held by thousands of employees of the Canadian National Railway. That has just been attested by the placing of a memorial plaque in the rotunda of the Union Station in Winnipeg and the placing of similar plaques in fourteen other cities across the Dominion.

The men will never forget the sincere and friendly interest which the late president took in their welfare. He also sought their co-operation. Hence the institution of the joint boards in certain departments of the system, where the men had a voice, along with the management, in settling differences and dealing with problems of various kinds.

The way in which Sir Henry took the men into his confidence, and the considerate and friendly spirit in which he always met them, is now recalled with deep appreciation, and a genuine desire was felt to erect memorials at all the main points on the Canadian National.

Sir Henry Thornton was not only a great railway executive, he was a big man. He showed it in strong human qualities and real concern for the well-being of the large Canadian National family who were making possible the vast improvements of the railway and the high status which it ultimately reached.—Winnipeg Free Press.

For Two-Cent Postage

It would be a commendable idea if the reign of King George VI brought back "penny postage." Canadians would welcome the two cent letter rate warmly. If a two-cent commemorative George VI stamp came with the rate it would give a happy touch to postal reform. — Brandon Sun.

Joyful News

Hint that Ontario may abolish all speed limits will be joyful news, particularly to the chap who's always in a hurry though he can never remember where he wanted to go in the first place.—Windsor Star.

THE EMPIRE

Empire Migration

It is more than 20 years since the steady and uninterrupted flow of migration from Great Britain to the Dominions and Colonies ceased to be a regular feature of the Empire's corporate life. It is true that various specialized efforts have been made in the meantime—in South Africa, for example, by the 1820 Memorial Settlers' Association—with varying degrees of success, to establish British emigrants in the Commonwealth overseas. But unless what we have termed "the steady uninterrupted flow of migration" from Great Britain can be resumed and maintained on the old pre-War level, nothing is more certain than that some of the outstanding qualities of the British race will be lost forever, both in Britain itself and in the Dominions, Colonies and dependencies.—Johannesburg, S.A., Times.

Live on $6 a Week

Somebody said that it was impossible for a girl to live in London on 30s. a week. Somebody replied that thousands of typists and shopgirls were doing it. A woman's magazine trying to discover how the feat was done, has found a girl who pays 12s. 6d. for her bedroom which she lets during the day for 7s. 6d. She spends her evenings at the public library, acquiring knowledge that may enable her to earn more money. Evidently it is just possible, but only for a girl who can be happy without lipstick, new frocks, cinemas, and dances. Could you? Could your daughter?—Manchester Sunday Chronicle.

"Measured by the advance made in other fields, radio in the last ten years has lived a century. Perhaps it may crowd a thousand years into the next decade."

—David Sarnoff.

"'Every man a king' is a good trick if you can do it. God couldn't, or didn't."

—Channing Pollock.

Sarah Churchill Wed To Vic Oliver

Sarah Churchill, the 22-year-old daughter of the British statesman, was married at the City Hall in New York to Vic Oliver, a night club master of ceremonies and comedian. They sailed on the Acquatania for London. The bride said her father had cabled his blessing. The couple is shown on ship after the ceremony.

HOUSES OF OLD CANADA BUILT TO ENDURE FOR CENTURIES

Pioneer Carpenters Took The Place of Masons in Early Days; Stone and Wood Combined

MONTREAL — An old building that was being pulled down by a gang of professional wreckers in the eastern section of the city, revealed strikingly how the pioneers planned, in addition to offering hints for current construction practice. There is only one way to see how a house is really built, and that is when it is going up or coming down, a wrecker observed.

Buildings and homes built more than a century ago are especially interesting, for during that period things were just as experimental as in the present era. Houses of the same period built by different men often show very striking variations in material and structure.

The first homes in Canada were wood, built by carpenters during early colonization days when skilled woodworkers were as scarce as the proverbial hen's teeth. Since there were few mansions in the colonies, the first stone houses were built by carpenters, which accounts for the composite type of construction in which wood is used with stone — showing that the workman was more familiar with framework than stone construction.

Big Stone Lacking

It is quite possible that colonial builders used wood in their stone houses often for the good reason that they lacked stone in the larger sizes. Wood lintels over doors and windows are the weakest part in most old houses. Had the houses been built by stone masons instead of carpenters, there would have been arches where long stones were not available.

A survey of old houses in some localities show that stone additions to a home were not bonded with it. The new wall was an entirely independent piece of masonry with no attempt to tooth the new into the old. Early builders realized the danger of disturbing a dry well. They further realized the possibility of the new wall shifting before it came to rest. Almost invariably a series of additions represented individual houses, one built against the other.

The best example of this type of building is the old Wall of London, originally built by the Romans. Basins uncovered from time to time, lying along the walls were not bonded to it. They were built later, and probably in places where the original wall had fallen. These little fortresses rather leaned towards the wall, acting as buttresses. The builders of both the Wall of London and the colonial stone houses foresaw the impossibility of preventing a long wall from cracking and so they made joints without bond at intervals.

Square-Shaped Nails

The tearing down of very old buildings and houses reveals how old-time builders kept their heavy and wide plank floors in place. The boards quite often were face-nailed with iron nails from four inches long, square-shaped and tapered. When these boards are pulled off by the wreckers, the nails are invariably found bent—most of them had turned in the floor joists. Where a nail had hit a hard knot, it curled up in much the same way that a dandelion stem curls up when split.

Anyone planning a heavy colonial floor might draw a lesson from the things exposed by the wreckers and use few nails but the right kind, and large enough to do the job.

World Output Of Gold High

Big Increase by Russia Is Largely Responsible For New Peak

WASHINGTON — United States treasury experts recently calculated the world's 1936 crop of gold at a new peak and pondered its effect on international money markets.

Production estimates for the world including Russia, suggested the total output of gold this year might approximate 40,000,000 ounces, as compared with a previous peak of 30,000,000 in 1935.

Estimates for the first 10 months of 1936 showed Russia alone mined 4,500,000 ounces more than during the corresponding period last year, and that world production outside Russia had been stepped up 2,500,000 ounces.

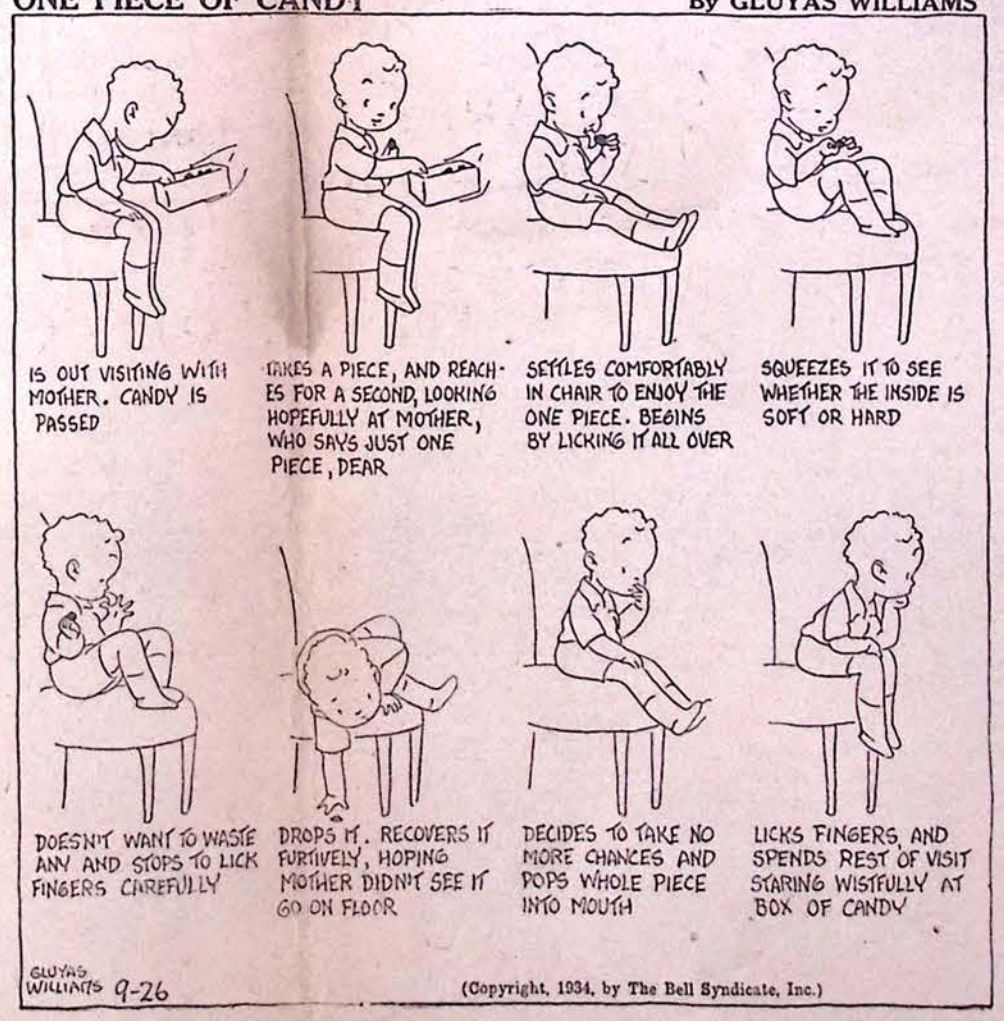

Normally, experts said such a large amount of new gold would tend to lower the value of money. The tight grip governments now have on their monetary structures, however, makes it difficult to predict how the outpouring will be reflected in money markets.

Because of a short winter Brazil has a surplus of woollen blankets.

Covering 27½ miles at a height of about 60 feet, a Breguet-Dorand helicopter is believed to have broken a world's helicopter record at Paris.

ONE PIECE OF CANDY

By GLUYAS WILLIAMS

(Copyright, 1934, by The Bell Syndicate, Inc.)

SPORT HOT SHOTS

By KEN EDWARDS

Last week we talked about tuna, this week it's swordfish. The new and popular sport is angling for swordfish. This is carried on extensively off the coast of New Zealand and Catalina Island, California.

The first swordfish taken on rod and line off the Atlantic coast weighed 193 pounds; that was in 1927. The mouth of a swordfish is much softer than that of a tuna, therefore it may shake the bait more readily.

If we say that the tuna fish is a terror to fight then the swordfish is a rip snortin' demon when he has been hooked.

Sometimes, when he is harpooned, the free end of the rope is tied to a keg and thrown into the water allowing the big brute to tow it around until exhausted It may be an hour or more before he is able to be gaffed by the dory-men.

Sometimes the powerfully driven sword has been known to pierce a two-inch plank. The greatest Nova Scotia swordfish catch in its history was 2,220,000 pounds in the year 1935. In 1928 the world's record swordfish was caught on rod and line in New Zealand. It weighed 673 pounds.

A Tribute To Spinach

Writes the Stratford Beacon-Herald — A six days bicycle ride was completed at Madison Gardens the other night, and the cook for these men who pedal night and day for a week (with brief rests) without going anywhere in particular reveals that they consumed half a ton of spinach. String beans came second with 988 pounds. Each man downed seven small steaks per diem, eight quarts of water and a gallon of coffee in the same time. When one is engaged in such strenuous physical tasks it is necessary to "stoke" pretty heavily.

It is rather significant that spinach was the largest item in their diet. This vegetable which is supposed to be so rich in iron has its detractors who say the mineral is not in an assimilable form. But the fact that experienced six-day bicycle riders place such faith in it is evidence that they have found it valuable.

However, if we ever enter a race of that kind we're going to choose Popeye as our partner. He can eat our share as well as his own and do most of the pedalling while we sit gracefully on the back seat and we wave our hand prettily in acknowledgment of the plaudits of the spectators.

Brief Comment

No persons are more frequently wrong than those who will not admit they are wrong. — La Rochefoucauld.

You can't keep a good man down, but you can tax him till he's sorry he ever got up. — Quebec Chronicle Telegraph.

A book attacking Mussolini can't be sold in Italy. Old Benito won't let the author make a lire out of him. — Idaho Statesman.

Wonder whether King Louis could have built Versailles if France had had newspapers watching his girl friends, and the tax bills?" — Editor & Publisher.

It is said that Mr. Stanley Baldwin is a great reader but there is no foundation for the rumor that he sent Mrs. Wallis Simpson a copy of "Like It." — F.P.A. in the New York Herald Tribune.

Swing Music

HOUSTON, Texas — The popularity of "swing" music will likely wane within a few months, Mrs. Montie Beach, president of the Dancing Masters of America, says, but the tricky tunes may have a lasting influence upon ballroom dancing. "It seems that swing dance music, an apparent novelty which probably will begin to lose its popularity within a few months, may have some influence on the manner of dancing the waltz and fox trots," she says.

Mrs. Beach, first woman president of the dancing masters and only person ever elected to that office four consecutive terms, said laymen, college youth and motion pictures had originated most of the dancing steps in recent years.

"Most steps originate with laymen and are perfected by the masters," she says

Highland Depopulation

Sir Donald Cameron of Lochiel was the principal guest on November 21 at the Caledonia dinner of the members of the Scottish group of the Forum Club, Grosvenor Place, London. Miss Jean Duncan was in the chair.

Sir Donald said it was appalling to think that the Highlands were gradually being depopulated. The whole trouble was, how were they going to provide a living for the people? They must have some subsidiary source of existence. He

PETIT DE GRAT NEWS

The gasoline tank in charge of Wilfred J. Landry had a successful year. There were 13,000 gals. gasoline, 500 gals. motor oil and accessories sold to the fishermen. Mr. Landry gave splendid service to all patrons of the tank.

J. A. Landry and the Richmond Shorefish, Limited, have completed the storing of ice required for their fish business.

Mildred LeBlanc, who spent two pleasant weeks with friends in Pictou, returned home on Saturday.

The Misses Thersa and Edith Landry, who were employed at Mulgrave, are home for the winter.

M. V. Nova II, Capt. Geo. Schmeisser, was in port on Saturday from Halifax and landed freight for local merchants.

Alphonse Samson, the genial and popular driver of the Bus and Motor Truck operated in connection with S. S. Surf, opened up the road from Petit de Grat and also to West Arichat by means of a snow plough attached to the heavy truck.

The Misses Stella Briand and Blanche Boudreau, who were visiting in Boudreauville, have returned to Poulamond.

There will be four fish traps operated out of this port the coming spring. Walter Landry and Dan D. Boudreau are the managers or the two new traps recently purchased. Quite a number of fishermen are interested in this venture and we wish them every success.

Viola Landry spent several days with her parents, Mr. and Mrs. J. A. Landry, returned to Mulgrave on Monday.

Fred Goyetehe, who is employed at Halifax, was a guest of his sister, Mrs. George Boudreau, for several days, returning on Saturday.

OBSERVER.

CORRECTION

The Richmond County Record

Dear Sir:—Would you pl correct an error and also an o sion that appeared in your issue, re officers of the St. Joseph's Credit Union Ltd. One of the Board of Directors, namely Louis Samson, should have read Louise Samson, and the omission was the name of Bertie LeBlanc as vice-president of the Credit Union.

Thanking you for past favors.

Yours truly

JOS. A. BOUDREAU

Petit De Gras, C. B.

Feb. 15, 1937.

What! READY SO SOON? I THOUGHT BREAD-BAKING WAS AN ALL DAY JOB

Save Baking Time and Trouble with Quaker Flour and the Easy Quaker Method.

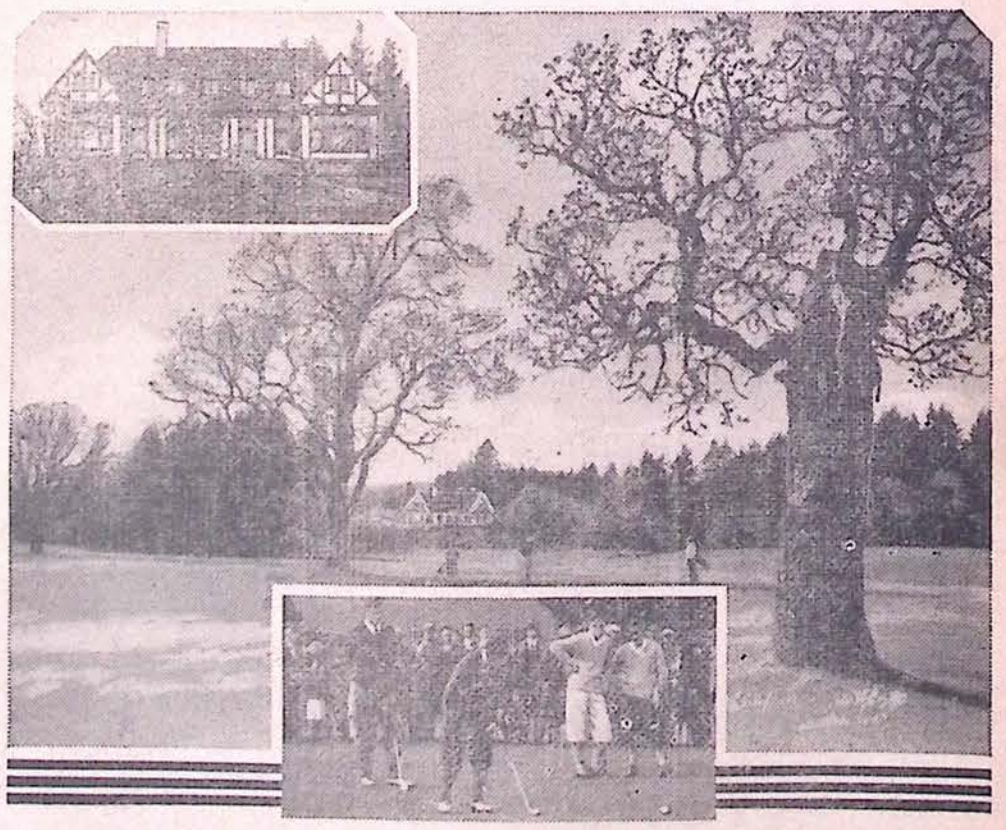

BAKE bread and rolls in half the time—with half the effort. Use Quaker Flour—and the Quaker Easy Method of Baking—that eliminates kneading, overnight setting—and gives uniformly delicious results every time.

Don't trouble yourself with old-fashioned baking methods—Send for copy of booklet "The Quaker Easy Method of Bread Baking" to The Quaker Oats Company, Box 100, Peterborough, Ont.—it's FREE.

And remember Quaker Flour is absolutely guaranteed to be the best all-purpose flour money can buy.

Quaker Flour Always the Same Always the Best for Bread, Cakes and Pastry

Empress Winter Golf Tournament

While the rest of Canada is shovelling itself out of snowdrifts, Canada's only mid-winter golf tournament of an international character will be held on the Royal Colwood Golf Club Course at Victoria, B.C., from March 1 to 6. This is the annual Empress Winter Amateur Golf Tournament, now in its ninth year, which brings well on to 200 enthusiastic golfers from Canada, the United States, and Europe into competition for a large number of valuable prizes, including the Sir Edward Beatty Challenge Cup, Chamber of Commerce Trophy, Victoria Rotary Club Bowl, and Matson Inter-District Team Cup.

Favored by summer-like weather, the tournament is the high-water mark of the social season for the winter colony on the sunny southern tip of Vancouver Island. Victoria will be in festive mood for the event, while Colwood's beautiful clubhouse and the regal Empress Hotel, with its gardens, conservatory, and Crystal Garden swimming pool, will form an ideal background for the colorful social activities which mark the six days of tournament play. Included as social features will be a dinner dance and entertainment every evening in the Empress Hotel, with presentation of prizes at a Grand Ball on Saturday night.

Golf experts and dubs alike will find competitions suited to them in the week's play at Royal Colwood, a lovely course constructed on park land, 6,291 yards in length, with a par 70 that was broken only once in tournament play. Play will be divided into classes for both ladies and men, ranging from open amateur events and handicap matches to features that stress the social side of the grand old game.
