Behind The Headlines

OTTAWA

BY DEAN WILSON

(Written for the Record)

In the two preceding articles of this series, two important questions of great interest to every citizen of this country were answered. Will the taxation burdens of the people of Canada be increased in the immediate future? The reply was no. Will business conditions in Canada suffer seriously from the bad slump in the United States? The answer was yes. Will the new trade pacts between Canada and the United Kingdom and the United Sta[illegible] produce radical changes in [illegible] tariff regulations? This article p[illegible] poses to answer this question.

During the past several months, officials of various departments of the Federal Government have been working energetically and diplomatically, night and day, to conclude arrangements with the representatives of the United States and the United Kingdom in order to facilitate the proposed Anglo-American Trade Treaty, which may appear to be an economic agreement to any casual observer but experienced men of affairs believe that it is nothing short of an international alliance for the mutual protection of the interests of these two major powers in the event that one or the other should become involved in some embroilment.

While Canada is anxious to aid the Motherland or any other section of the British Commonwealth of Nations, yet it is no secret along Parliament Hill that Canada does not want to sacrifice any interests of a material kind of this country, if the same object can be achieved through another method. Therefore, all rumours or stories which have been circulating throughout the country that the Government at Ottawa is ready and willing to give up trade facilities in the markets of the United Kingdom or the United States in order to allow the completion of an Angle-American Trade Treaty, are absolutely wrong, and every reliable opinion in the Capital agrees with this statement.

A few necessary changes in the trade agreements between this country and the major powers will be made from time to time, and these changes are necessary for technical and moral reasons since they are required for the creation of a Washington-London axis, but there is absolutely no intention to surrender any trading facilities or rights for the mere reward of sentiment or as a noble gesture. In fact, it is known that the Federal Government will not sacrifice the interests of anyone in Canada without a proper compensation or economic readjustment.

There have been many exaggerations about the nature and extent of these new trade pacts which involve Ottawa, London, and Washington, and the truth of all the trade conversations between these capitals is that all three governments are not far apart in their desires and intentions, neither do they contemplate any radical moves in the present agr[illegible] nor will any revolution[illegible] changes take place in the pres[illegible] agreements, nor will any revo[illegible]ionary changes take place in [illegible] of [illegible]diate future.

[illegible]ple
[illegible]
[illegible]ports have been circulating that [illegible]shington wants to replace Can[illegible] la[illegible] the markets of the United Kin[illegible]and likewise the Mother[illegible]land [illegible]nts to get into the American mar[illegible] at the expense of the Canadia[illegible] traders there, but a few cases can [illegible]strate that all stories are gross[illegible] exaggerated. For example, it is [illegible]id that Washington plans to replace Canada in the United Kingdom markets for such products as apple[illegible], pears, salmon, and lumber.

During the past two years, Canada sold about $8,500 000 worth of apples each year in the markets of the Motherland, while the United States sold more than $6,000,000 and $7,000,000 worth of apples in the same two periods. Therefore, there can be no great concession or sacrifice required from Canada in order to comply with the request of the United States that Uncle Sam's apples should have a chance [illegible] alive to Canadian figures. Lately, Great Britain has been buying about $5,000,000 a year of canned salmon from Russia and the United States, with the figures for Canada on this same product reading less than $3,500,000 Consequently, any changes would occasion no undue hardships on this country because there is no difficulty in selling the Canadian salmon in many markets of the world. Lumber provides a problem, yet it is not beyond solution and in time it is quite likely that Great Britain will grant trading facilities for this product from Canada at the expense of the Baltic products. There is complaint that Canada may lose the pear markets in the Motherland, but it is once again an exaggerated story because the present situation finds the whole British pear market divided between the United States and Australia, the latter country selling more than $1,800,000 worth of pears a year at the present time and United States selling more than $3,500,000 worth of this same fruit, while Canada, shipping less than $150,000 a year, is really not seriously concerned in the whole subject. This means that the market for this fruit will be improved for the United States at the expense of Australia, but not this Dominion.

It is obvious that the new trade pacts between Ottawa, London, and Washington, will not bring radical changes in the present agreements between these three governments, and whatever alterations in tariff regulations result from these new treaties, these modifications will not affect the taxation burdens and standard of living of the average Canadian since all changes are being carefully studied by experts and economic readjustments will accompany and balance any losses that may be incurred in these international transactions.

PURE TEA Is good for you!

BECAUSE—Headaches frequently disappear after a bright fresh cup of tea.

Remember King Cole

Letter From Petit De Grat

Editor Richmond County Record.

Dear Sir,—The item on handicraft in the Petit de Grat news in Friday's paper, which gave people to understand that Miss Muriel Boudreau and her mother, Mrs. A. L. Boudreau, were the only two leaders of our handicraft school, and should be given the credit for the fine work which was performed there during the winter months, has given us a very wrong impression. It is true they were leaders, but what happened to the other leaders—Mrs. Harry T. Boudreau and Miss Zita Boudreau? Are we not to be thankful to them also for their teaching?

Let not Miss Boudreau and her mother think they should get the credit for all. Self-praise is a poor recommendation. All honors go to Miss Louise Samson, teacher of the primary department of our consolidated school, for organizing the sewing circle and handicraft work, and thanks to the leaders for teaching this work.

Those wonderful leaders as Miss Boudreau and her mother have now deserted the club, but the work is still functioning as strong as ever and will continue to do so while Miss Samson has charge of her department.

L'ARDOISE NOTES

Miss Evelyn Lafford, Grand Greve, and David MacCuish, of St. Peters, were motor visitors in West L'Ardoise on Sunday, the guests of Miss Mary Monbourquette.

Mrs. Joseph Peters and Miss Beatrice Peters are recent visitors from Sydney, the gussts of Mrs. Dan Peters.

Mr. and Mrs. Helier Briand arrived from Sydney on Friday after spending a couple of weeks visiting friends and relatives.

Mrs. Simon Martell left for St. Rita's Hospital, Sydney, to undergo treatment and X-Ray examination. Her many friends wish her a speedy recovery.

D. K. Matheson and Anthony Sampson were recent motor visitors to Sydney.

A very pretty wedding took place on Monday at a nuptial mass, Rev. Fr. Boudreau officating when Miss Mildred McGrath was united in marriage to Jeffrey Landry. The bride looked charming dressed in navy blue and carried a white prayer book. Her bridesmaid was Miss Evelyn Sampson, who was dressed in rust with brown accessories to match. The groomsman was Thomas McGrath, brother of the bride. Dinner was served at night at the groom's parents. About one hundred and seventy people were present. They were the recipients of very many gifts.

Harry Murphy arrived from Sydney to spend the week-end with his mother, Mrs. Maisie Murphy, Point Micheau.

PORT MALCOLM NOTES

Owing to the bad weather, the lobster fishermen, have had quite a task, getting their gear ready to set. The smack has been around looking for fish, when some are caught.

Planting will soon commence now but the ground is terrible wet owing to so much rain.

Capt. John F. Proctor was on a business trip to Grantville this week.

Mrs. Howard Malcolm and Mrs. Michael Whalen arrived home, after spending some time visiting friends and relatives in Stellarton.

Miss Myrtle Malcolm is on extended visit to her daughters Mrs. Fred Hartling, and Mrs. Violet Hartling, Stellarton.

Mrs. James Foster and children of Sydney are visiting her sister Mrs. George N. Malcolm the past three weeks.

Messrs William and Hiram Malcolm, left here a few days ago for Charlottettown, P. E. I. to join the schr. Nellie J. King, Capt. Gault Murray, for the summer.

It is said Howard Malcolm, is closing his house here for the summer. Mrs. Malcolm will join him at North Sydney, where he is employed on a C. N. R. working car stationed there at present.

An action group is now being formed within the Conservative party, Actionaries vs reactionaries. That ought to be a real fight.

Curl In the Pig's Tail

Last year Canada sold to Great Britain 193 million pounds of bacon, equivalent to 1,600,000 hogs. The curl in the pig's tail appears to be assuming the shape of the $ sign.—Kitchener Record.

A Stream of Talk

The average man talks two hours out of every twenty-four at the rate of 100 words a minute. He utters some 4,500,000 words a year. The authority doesn't say so, but we presume he is talking of single men. — Chatham News.

What Chance Has It?

The latest scientific aid to safe driving is a red light on the dashboard which warns motorists when they approach grade crossings. But if they won't heed tooting whistles, ringing bells and wig-wagging signals, what chance has a little red light?—Windsor Daily Star.

Help to Farmers

Agriculture is at last to receive greater recognition. The prosperity of the province depends so much upon the well-being of the farmer that it would be nothing short of criminal, now that the money is available, not to recognize the demands of the farming community for greater assistance in placing agriculture in a better position to play its full part in the development and progress of the country.—St. Thomas Times-Journal.

Wants Less Provincial Power

We may not always agree with Denton Massey, M.P., but we can see some validity in his claim that Canada is in danger of becoming "Balkanized." He, like most of us, sees provinces seeking to assert too much authority with a consequent danger to federalism. There is such a danger. There is far too much emphasis laid on "provincial rights," which usually means a reaching out for federal powers. Probably what is needed is less provincial power. There is a growing body of public opinion, which even believes it might not be a bad idea to abolish the provincial governments altogether, with consequent saving in taxes and trouble.—Niagara Falls Review.

A Changing Ontario

In Middlesex and Lambton counties rapid changes are taking place. The sons of the old pioneer families are not staying on the farms. They are selling out in many cases to the New Canadians of alien origins. In Lambton County, particularly near Alvinston, there is a large settlement of Czechoslovakians who have bought out old farms. They are making excellent settlers. They are happy just now that they are living in Canada and not in Czechoslovakia. The majority of new settlers are anxious to take out citizenship papers and to become good Canadians. They are ready to adopt our ways and our customs. Possibly in the end it is not such a bad thing to have an infusion of new blood. In any case, whether we like it or not, the Western Ontario of a few decades from now may be an entirely different Western Ontario from that of our day and generation.—London Free Press.

New Process Makes Pictures On Metal

Photographs Produced In This Way Are Much More Accurate

The Aluminum Company of America disclosed last week at Pittsburg that it has perfected a method of making pictures on metal which was expected to be more enduring and more accurate than those taken on paper.

It presented the first portrait made by the new process to Dr. Paul D. Merica, whose research work on the precipitation hardening of alloys led to a more diversified use of metals.

Do Not React To Changes

The pictures are made on a patented metal about one-sixteenth of an inch thick, which contains an oxide coating, with the sensitive silver salts that react to light. When exposed to light sent through a negative an image is produced on the metal.

A spokesman said the metal pictures have proved more valuable for aerial surveys, where a surface, absolutely accurate, was needed.

He explained that a slight change in temperature causes contraction or expansion of paper pictures, and that such slight distortion would bring about a grave miscalculation of distances. The metal pictures do not react to such changes, he said.

THE EMPIRE

Rising (?) Sun

The core of the Chinese armies is still intact; the Central Government, with the whole-hearted support of a united nation, has never been stronger; and Japan has been forced to enlist the good offices of a European Power in order to make peace overtures which have been rejected with the contempt they deserved. Turn back the calendar, may be the wish of most Japanese. Too late, their awakening. Japan is caught in the toils of a war, the outcome of which is perfectly clear—all too clear to the Japanese. She has antagonized the Powers of the world by h brutality. Her troubles at home are increasing daily. News of insurrections in the territories she has torn from the mainland in previous "raids" leaks out to the world. The Land of the "Rising" Sun. We wonder!—Hong Kong Press.

Irish Living Costs

For a time Ministers were disposed to deny that there was any increase in the cost of living, but when they could no longer persist in that attitude they proceeded to make the case that the increase in the cost of living was a sign of greater prosperity. The housekeeper in town and country has to pay higher prices for all her requirements. The citizens, as taxpayers, are, for the same reason, called upon to provide the funds needed by the Exchequer to defray the additional cost of living bonus. The citizens, as ratepayers, are similarly affected . . . . While the costs and charges to which we have referred have been mounting, the income of the chief producing class in the country—the agricultural community—has been relatively diminishing. For everything he has to purchase the farmer has to pay more, and as his income is much less than it had been, obviously he is compelled to limit his purchases to a bare minimum. This decline in his purchasing power is detrimental to the manufacturer and trader.—Irish Independent, Dublin.

Indented Road Reflects Light

New Type Surface — Engineer Offers Scheme to Aid Night Drivers

A new type of road surface that will "increase visibility very greatly" was reported at the 17th annual Massachusetts Safety Conference at Boston last week.

Need for some such surface was emphasized by a group of engineers discussing "highway lighting in relation to night accidents."

They pointed to mounting automobile fatalities after dark, restrictions on headlights, and experience "proving" the impracticability of enforcing speeds within the limits set by headlight visibility.

The Only Safe Speed

L. A. S. Wood, lighting engineer, said that "10 to 15 miles an hour is the only speed safe with present lighting equipment."

The problem, therefore, these engineers agreed, was one of getting enough light of the right kind in the right place on the highway.

C. A. B. Halvorson, of Lynn, Mass., announced that the new type of road surface was developed during an attempt by the research experts to design a surface that would allow drivers to see farther without glare. Crux of the problem, he said, was to get hold of a design that would do its job as well in wet weather as in dry.

Pitted At Intervals

The design he finally settled on makes his miniature test road look like one of those pans you put in the oven for hot biscuits. Little "cups" pit the road at intervals of an inch in diameter. Mixed with this indented surface is a substance, such as quartzite, which gives a high reflectivity.

Spaghetti Shooting

"I went crazy because I was offered spaghetti instead of steak for my supper." A man offered this explanation recently to Chicago police after shooting his 17-year-old daughter and wounding his 21-year-old son. He missed his wife.

Walking For Ten Years

The most energetic man in the world has been walking for 10 years. He started in 1927 to walk round the world. Now he has completed 80,000 miles—more than three times the earth's circumference.

Whales have been known to break their jaws on the ocean bottom, after a mile deep dive.

Tissues Outlive Organism Growth

Animal And Plant Tissues Both Can Live On, Celebrated Botanist Announces

Living tissues have the power to survive long beyond the life of the growing organism. This was demonstrated in the case of animal tissues by Dr. Alexis Carrel, who kept tissues from an embryo chicken heart alive longer than the greatest life span of a chicken. The culture is still alive at the Rockefeller Institute after more than a quarter of a century.

Blossoms Alive For Months

Dr. Carl L. LaRue, of the department of botany, University of Michigan, has demonstrated that it is possible to keep plant tissues alive 365 times as long as they would survive in the plant. He took portions of the blossoms of plants which have but a short span of existence under natural conditions and placed them in a nutrient culture medium, similar to that in which germs and other micro-organisms are cultivated.

After a given structure has fulfilled its function in the plant, its nourishment is withdrawn and it disintegrates. The nourishment available is then diverted to the newly developing structures. When the blossom has finished its task it makes way for the fruit.

Scenes Recall Klondike Days

Yellowknife, N.W.T., Now Packed With Seekers After Gold

EDMONTON. — Scenes reminiscent of Dawson City during the Klondike rush, are being enacted at Yellowknife, N.W.T., centre of the gold field on the north shore of Great Slave Lake, Leonard E. Drummond, secretary and manager of the Alberta and Northwest Chamber of Mines, said. He just returned from a 10-day aerial inspection trip of far north mineral areas.

Airplanes Bring Men In

"Airplanes are bringing men in daily who are seeking work and the work hasn't started yet," he said. "The result is there is no hotel accommodation for the new arrivals. Men are forced to undress and dress almost in public. It's almost like the Dawson says."

Mine managers in Yellowknife, Gordon Lake and Goldfields, whom he visited during his tour, asked him to issue a public warning to work-seekers not to consider going into these areas yet as it will only add to the difficulties and work will not start until the summer, Mr. Drummond said.

Commenting on the activity in the north, Mr. Drummond said "there's no question it will be a big year."

Longevity Of Canadians Is Steadily Increasing

Life Expectation In the Dominion Is Shown By Latest Figures To Be Higher Than In Either The United States Or Great Britain.

Investigations into longevity tend to reinforce the Biblical dictum that the span of life is three score and 10, the Dominion Bureau of Statistics announced this month as official life tables for the general population of Canada were issued for the first time.

"It seems that today, in Canada particularly, there are far more people attaining the allotted span than ever before in history but there are not appreciably more centenarians than there were 100 years ago," the bureau said. "The decreasing mortality at younger ages is [illegible] of the vastly smaller [illegible] among young people today.

More Years In Prospect

Based on the 1931 census, which was the first to compare deaths with living population in order that probabilities of dying could be reckoned, the survey showed that the Canadian boy of five can look forward to 62.30 years of life. An English boy has only 60.00 years, and the American boy 59.38 years.

As a person grows older the expectation of life steadily decreases. When a Canadian youth reaches his majority he has in prospect 48 years to live on the average. When he gets to 40 he may anticipate living 32 years more. When he retired at about 65, he may expect to have a comfortable 13 years of retirement and die at 78. If he reaches 80 he should live six years more and even when he arrives at the century mark his expectation of life is two years.

Study of mortality in 15 countries, show that only two have a lower male mortality from ages 25 to 45 than Canada, these being Denmark and Holland. Chance of an Italian boy of five dying is 39 per cent. greater than that for a Canadian, of a Japanese boy 169 per cent., and an East Indian 637 per cent.

Healthy and Vigorous Elements

"In addition to our healthy climate, advanced facilities in medicine and public health and our standard of living, all of which undoubtedly contribute to our remarkably superior longevity, there is the factor of selection through immigration," the report continued.

"When large movements of population take place there is a tendency for the more healthy and energetic elements to move while the less healthy stay at home. Hence it is that Western Canada has the lightest mortality as the three provinces have received much of their population very recently."

News In Review

To Control High-Power Stations

OTTAWA. — It was the ultimate policy of the Canadian Broadcasting Corporation to take control of all high-power broadcasting in Canada, L. W. Brockington, chairman of the Board of Governors, told the Parliamentary Committee on Radio.

Some permits had been granted for private stations with power up to a maximum of 1,000 watts, but no increases would be permitted above that maximum, to private stations, Mr. Brockington said.

Eventually it was the intention to restrict private stations to "purely local functions."

The Heart of Europe

VIENNA.—"The political heart of Europe no longer beats in Paris, but in Berlin," Propaganda Minister Goebbels of Germany declared this week in an Anschluss plebiscite campaign speech.

"In ten years' time, it will be understood what that signifies," he said.

Appealing for a 100 per cent. vote by Austrians in favor of union with Germany in the April 10 plebiscite, Goebbels said that grave decisions taken by Chancellor Hitler — leaving the League of Nations, remilitarizing the Rhineland and absorbing Austria —were all full of risks.

Warns of Depression

OTTAWA.—Right Hon. R. B. Bennett sounded a warning in the House of Commons this week that Canada was on the verge of a depression similar to that of 1930.

The Opposition Leader charged that "the danger signals are already flying," and that the upward trend of the past three years had suddenly stopped. The signals to which he referred, he said, were that exports had fallen off drastically, that unemployment was "growing by leaps and bounds, 25,000 in one month," that business men were refusing to invest money because they lacked confidence.

Trafalgar Square Sees Another Demonstration

Twenty thousand jammed London's Trafalgar Square recently to protest against the German annexation of Austria. Here are mounted and foot police [illegible] a deputation seeking to take a letter of protest to the German Embassy. Eventually a few [illegible] ed to pass and deliver the letter. The crowd was shouting 'Hands off Czechoslovakia!"

News Parade

Commentary on the Highlights of the Week's News . . . By Elizabeth Eedy

INSIDE PRESSURE—By taking over Austria, Reichsfuehrer Adolf Hitler's chief gain has been the increase of his own prestige with the German people at a time when their faith in him badly needed bolstering. His Austrian coup has served for the moment to distract German minds from the army purge, mounting unemployment, shortage of food essentials, loss of personal freedom.

Observers say that the move is accomplishing little in the way of bettering the desperate economic conditions of the Reich. Austria, too, is deficient in foodstuffs and raw materials, has to import between 700,000 and 900,000 tons of grain a year to feed her people. Sole resources present there in any sort of abundance are iron ore and timber, which Hitler and his financial advisers plan immediately to exploit. By selling the iron ore and timber outside the country, they will be able to hoard more foreign capital and stave off economic collapse for the present.

The seizure of Austria is then only a stop-gap, a temporary measure, to be followed by moves much more drastic, infinitely more brutal. Inside pressure drives Germany outside herself, forcing the country on and on to further and still further aggression. There is no foundation for the hope that Hitler will stop where he is.

—o—

DOG EAT DOG—It won't be long now before Poland, having won the first round of a bloodless fight with Lithuania, by forcing that country to accept Polish terms in settlement of a border dispute, will be making new demands of her neighbor. The truth is that Poland would like to annex Lithuania, thereby gaining more outlets on the Baltic. It is pretty generally agreed that Poland, supposedly an ally of France, has been backed up in the Lithuanian dispute by Germany in return for a promise of Polish support for some other moves Hitler has in mind . . . one of which might be a boycott of Czechoslovakia.

Professor Albert Bushnell Hart of Harvard, dean of American historians, however, is of the belief that Germany is actually planning to annex Poland. Case of dog eat dog, we opine.

—o—

HOLDING IT UP—It was admitted by Prime Minister Mackenzie King in the House last week that the reason the present session has not dealt with the proposed amendments to the British North America Act (empowering the Federal Government to enact unemployment insurance legislation) is that three of the nine Provinces have failed to communicate with him, giving their views on the matter.

The draft of the proposed amendment was submitted to all Provincial Governments, January 20. New Brunswick and Quebec had not up to this week acknowledged receipt of the draft.

—o—

NORMAL CROP—From the drought areas of southwestern Saskatchewan are coming reports of water flowing in creek beds, rivulets and lakes, storing up greatly-needed water. At Regina it is said the country has received the largest amount of moisture in many years. Further, it has been an open spring with a rapid thaw of heavy snow in many parts.

A "normal" crop is looked for by the farmers of Saskatchewan. Prospects long seen hopeless are brightening again. It will be a wonderful thing for Canada if the West really is beginning to "come back."

—o—

SCAPEGOAT—In primitive times, high priests of religion were wont to place all the blame for plagues, defeats in war, sins of the people, on some innocent animal, for instance a goat, which they put to death with great ceremony. When the goat had been killed, the cause of the evil was supposed to have been removed and expiation made. Hence the origin of "scapegoat."

Though we are far from primitive times today, we still have our scapegoats. It looks as though Ex-Chancellor, Dr. Kurt von Schuschnigg of Austria is going to be one of them.

Branded now as a traitor by Adolf Hitler, he will be tried for treason against the German Reich, in Leipzig this summer. The court proceedings, it is reported, will be public and widely publicized on purpose to prove to the world that all the blame for Austria's plight rests on Schuschnigg's shoulders. Germany hopes that the death of Schuschnigg on the chopping block will silence all criticism of the Nazi annexation.

—o—

CHINESE HIT BACK — Counterthrusts by Chinese armies are resulting in victories over the Japanese throughout the entire Central China front. Reports last week had it that *Generalissimo Chiang Kai-Shek* himself was at the central battle front in personal charge of the drive. Certainly it is definite that the Chinese have met with striking military success in Shantung, Shansi and Anhwei Provinces.

It is still too early, however, to predict that the tide is turning against Japan.

The Arctic Tern Flies Very Far

Long-Distance Champion — In Three Months One Globe-Trotting Bird Flew From Labrador to Nigeria.

Now that the northern bird migration is getting under way, the vast distances which these travellers cover in flying to and from their nesting grounds is a topic of current interest.

The powers of endurance displayed by large numbers of North American birds on their lengthy migratory journeys is amazing, but there is one species that out-rivals them all. This is the Arctic tern, aptly referred to as "the champion globe trotter and long-distance flyer of the bird world."

Circumpolar Range

The species is well named, as its range is circumpolar and it nests over the Arctic land as far north as suitable conditions can be found. When the young are well-grown the Canadian and Greenland terns disappear from their breeding grounds and a few months later may be found even as far away as Africa. In fact the longest flight on record for an individual bird was achieved by an Arctic tern that in three months flew from the coast of Labrador to the Niger River in Southeast Africa.

Traverses Atlantic

The journey of the terns is believed to follow a route touching upon the west coasts of Spain and Africa, and on the return trip northwards individuals are known to fly along the east coast of South America.

The route indicated for this bird is altogether unique, as no other species is known to breed abundantly in North America and to traverse the Atlantic Ocean to or from the Old World. These globe-trotting birds travel many thousands of miles and touch on four continents in the course of a year.

Don't Skate On Ice

When ice skaters skim along over a smooth stretch they are not actually sliding on ice but on water. The ice melts under the skates, due to the friction, and the skates move along on a thin film of water. Increased pressure, as all physicists know, also melts ice, and the weight of the person on skates provides pressure which combines with the friction to change the ice to water.

Girls at cocktail parties in Manchester, England, are served sandwiches of various hues, cut from loaves of many colors, to match their drink or dress.

Headache After Headache

Now She's Free From Them

A woman writes:—"I would like everyone who suffers from headaches to try Kruschen Salts. Before taking Kruschen I was seldom free from a headache. But since I have been taking it regularly I have hardly had a headache, for which I am very thankful. I have been taking a small dose of Kruschen every morning in a glass of warm water, before my breakfast, and I feel so well."—(Mrs.) A.E.D.

How do you deal with headaches? Do you just take something to deaden the pain, without getting rid of the trouble which causes the pain?

Headaches can generally be traced to a disordered stomach and to the unsuspected retention in the system of stagnating waste material which poisons the blood. Remove these poisons—prevent them forming again—and you'll never have to worry any more—from that cause. And that is just how Kruschen Salts bring swift and lasting relief from headaches. Kruschen aids Nature to cleanse your body completely of clogging waste matter.

HAVE YOU HEARD

The poor souls who take unto themselves the worries of other people cannot find much pleasure in life.

Professor — "Fools ask questions that wise men cannot answer."

Frederick — "I wondered why I had flunked in that chemistry exam."

A pun, says a humorist, is the finest form of humor. That is true, if you happen to be the fellow who pulls it.

Mrs. Briggs was vigorously powdering her nose before going out.

Husband (who was patiently waiting in the hall) — "Why do you go to all that trouble?"

Mrs. Briggs (shrugging her shoulder and smiling) — "Modesty, my dear Henry."

Husband (ejaculating) — "Modesty?"

Mrs. Briggs — "Yes, I've no desire to shine in public."

Manager — "What's the matter, Jenkins? Can't you serve this good customer?"

Assistant — "No sir, He is trying to find two shoes which squeak in the same key."

READ IT OR NOT!

A cafe in Loveland, Colorado, has a sign offering "free coffee any time during any day the sun is not shining."

She — "Did anyone ever tell you how wonderful you are?"

He — "No, I don't think anyone ever did."

She — "Then I'd like to know where you got the idea?"

'Give 'Em While They Can Smell 'Em'

Artist Chuzz (in front of dental display window) — "I think I'll get myself a new set of teeth like those over there."

Mrs. Chuzz — "Hush, don't you know that it's impolite to pick your teeth in public?"

Along Life's Pathway

I'm treading life's rough path, and I
stumped my toe against a stone;
And, oh, it hurts so terribly I uttered a loud moan!
Had I been going slowly, I'd have seen
it — and then passed;
But in my haste I didn't look, and met
it — going fast.
In pain, I thought: "I'm rushing to a
date — and may be late;
But I can aid some traveller, if I'll
just hesitate.
I stooped — and moved that stone
aside, to help some unknown brother
The rocks which we have stumbled
over should ne'er retard another.
— Lyla Myers

The prospective juror asked the court to be excused.

Prospective Juror (explaining) — "I owe a man $10, and as he is leaving town today for some years, I want to catch him and pay him the money."

Judge (in a very cold voice) —"You are excused. I don't want anybody on the jury who can lie like that."

The best kind of pride is that which compels a man to do his best work even though no one is looking.

Joe (reading death statistics)—"Say Phil, do you know that every time I breathe a man dies?"

Phil — "Then why don't you use a mouthwash?"

The best talker is the man who listens.

Science has not been able to explain satisfactorily just why some lightning flashes show up black when photographed. The only explanation, so far, is that the wave-length of the light causes the unusual chemical reaction.

Ontario to Pay $14,000,000 For Highway Construction

The Coming Year — Provincial Government to Make Roads As "Fool-Proof As Possible".

Ontario will spend $14,000,000 on highway construction in the 1938-39 fiscal year, Premier Hepburn informed the Legislature at Queen's Park, Toronto, in his budget address. The proposed expenditure compared with $35,000,000 last year.

Added highway safety will be the slogan, with engineers instructed to satisfy themselves the finished road is as nearly fool-proof as possible. The Government visions the day when the main arteries of the system will be in the nature of the super-highway, eliminating incident of accident.

Completing the Gaps

Special consideration will be given to completing gaps in the highway system. Typical of this is the middle road, modern Toronto-Hamilton highway, which must be carried into Toronto so congestion will not apply either on the road or in the city where contacts are made.

In Northern Ontario last year the Government constructed 70 miles of new pavement, a greater length than had been completed in all the years from 1920. It prepared 175 miles of grading ready for surfacing this year. Pavement construction in Southern Ontario totalled 264 miles and 75 miles of grade were finished, most of which permits dual highway development [illegible] year.

Larger Tourist Business Seen

In Coming Season — Unsettled Europe to Lose and Canada Gain

Despite the economic recession in the United States and Canada, the Canadian Travel Bureau of the Transport Department expects the tourist traffic will be as large this year as last when it was estimated visitors to the Dominion spent $295,000,000. In 1936 the tourist traffic brought $255,000,000 to Canada.

Inquiries to the bureau from United States residents between November 30 and March 20 totaled 17,000 compared with 14,000 for the corresponding period a year ago. This would indicate, travel officials declare, that the tourist business this year would at least hold its own. In addition requests from resort and travel bureaux, automobile clubs and transportation companies for literature about Canada is the largest since the travel bureau was established here in 1934.

Visit Canada Instead

The danger of war in Europe is offsetting the hard times in United States. Many who normally would have crossed the Atlantic this summer will visit Canada instead and many travel organizations in the Eastern States accordingly are concentrating on directing tourists to New England and the Maritime Provinces. Other bureaux in the Middle West are following the example and directing trippers to other parts of Canada.

Canada is also going after the tourist business from the United Kingdom, Transport Minister Home announced. An advertising campaign has been started there to encourage Britons to come to Canada for their holidays.

World's Greatest Tourists

The tourist business is not all one way. Canadians, per capita, are claimed to be the greatest tourists in the world. They spent in other countries last year 123,000,000, of which about $120,000,000 was in the United States. This works out at more than $10 a head. If the $295,000,000 spent by Americans in Canada were divided among the entire population of United States it would average less than $2.90 a head.

Eire to Build Large Airport

MANCHESTER, Eng. — The Government of Eire will spend £500,000 ($2,500,000) to build an airport near the mouth of the River Shannon to facilitate trans-Atlantic air service, the Manchester Guardian said last week, following the conclusion of a three-day conference at Dublin on such service.

Commander C. P. Edwards represented Canada at the conference, attended also by delegates from Great Britain, Ireland and the United States.

Two companies, one representing the United States and the other joining Canadian, British and Irish capital, alone will be permitted to use Irish airports, the newspaper said.

Science Takes Minerals Back From The Sea

Salt, Bromine, Magnesium Are Being Extracted From Water of Ocean But Recovering Gold Is Still Doubtful Proposition.

Declaring the Pacific Ocean a source of raw material for numerous potential industries, two University of Washington natural scientists reverse the common idea of the ocean being merely a means of transportation and origin of foods.

Recovery of common salt from the ocean is one of the oldest of all chemical industries, reminds Dr. Thomas G. Thompson and Dr. Rex J. Robinson of the Oceanographic Laboratories at the University. But ethyl gasoline, and magnesium compounds used extensively in cosmetics and chemistry is a recent and complex process, they state.

Technical Difficulties Overcome

The professors described the plant of an eastern chemical company at Cape Fear, N.C., where 15,000 pounds of bromine is extracted daily from the sea. When it is realized a gallon of sea water contains less than one one-hundredth of an ounce of bromine, it is possible to see that the process is a triumph of applied difficulties which were overcome.

In San Francisco, another company is recovering approximately 16,000 lbs. of magnesium compounds of marked purity from the sea daily. A gallon of sea water contains less than two-tenths of an ounce of magnesium.

Although there has been considerable talk and some research on recovering free gold from sea water, neither Dr. Thompson nor Dr. Robinson viewed such an accomplishment as of commercial importance in the near future. They based their statement on recent analysis of waters of Puget Sound for gold.

GARDENING

SPACING

In planting shrubbery, a good general rule to follow is to allow about half as much space between plants as the height of those plants when fully grown. This will mean that the ordinary Spirea Van Houtei, for instance, a shrub about 6 to 7 feet in height at maturity in most parts of the Dominion, should have at least three feet between it and a neighbor. The rule holds good for most things from eight feet down to a few inches, and it particularly applies to planting about foundations.

Very often shrubbery is placed very much too close to the house wall or fence with the result that the full, beautiful symmetry of the bush is not attained. The rule about spacing does not hold good for large trees, however, which can be placed much closer together for clump or background effect but must not be permitted to shade the ground entirely if grass or flowers are to be grown underneath.

FIRST PLANTINGS

Leaf lettuce, radish, spinach and the first of the garden peas will be among the earliest vegetables sown. These may be planted as soon as the ground is fit to work. All of the first named seeds should be sown at least three times at intervals of ten days so that there will be succession of vegetables. The second group to go in will be carrots, beets, onion, potatoes, etc., that can stand a little frost, and then the beans, corn and tomato, cabbage and cauliflower plants, etc., which kill with frost, and finally those hot weather vegetables like lima beans, the squash well started, egg and pepper plants, cucumbers, melons and similar things. All garden rules, it should be remembered, however, are only approximate and should be varied a little to suit the local climate and individual preference.

"Big Head" Census Is Scientist's Aim

WASHINGTON.—The Smithsonian Institution wants to take a census of the nation's bigheads.

Believing that the "thinking muscles" of the brain develop like muscles of the arms and legs, Dr. Ales Hrdlicka, Smithsonian anthropologist, sent out a call last week for reports from any man or woman who has noticed a recent increase in head size.

Following a recent appeal through a scientific journal, Dr. Hrdlicka received reports from 20 scientists that their heads had grown. There is evidence, he said, that the heads of persons doing intense mental exercise increase more rapidly than others.

Sections of the new Moscow-Volga Canal in Russia have been found ideal for winter sports, one being the pulling of skiers by motorcyclists.

"IT BEATS THE BAND"

—the way Ogden's Fine Cut satisfies particular "roll-your-owners". They'll tell you that this smoother, mellower Fine Cut is a sure bet for the man who wants to drum up a full measure of smoking pleasure. Ogden's Fine Cut with "Chanteclet" or "Vogue" Papers—that's the marching tune to genuine satisfaction in rolling your own cigarettes.

Pipe-Smokers!—Ask For Ogden's Cut Plug

When The Corpse Slapped His Face

A good number of people have been hanged and lived to tell the tale, folk-lore would have us believe. The case of William Duell is a strange one. On the morning of November 24th, 1670, he swung from the Tyburn scaffold, London, England, for twenty-two minutes. Then a representative from the Surgeons' Company asked to be allowed to cut the body down and take it away for dissection. Work on the body was just commencing when the dead man groaned, and raised himself up on his elbow!

Messages were sent to the Sheriffs who arrived to take the boy away and hang him again, but a huge crowd had formed outside the hall and, feeling that the boy had been saved by Providence, roughly handled the officers of the law.

Another case was the amazing one of the body that came to "life" in the Surgeons' Hall and struck one of the surgeons in the face, with the result that the latter died of fright!

C.N.R. Operating Revenues Down

MONTREAL.—The statement of operating revenues and operating expenses of the Canadian National Railways all-inclusive system for the month of February issued here last week shows operating revenues were $13,289,721, as compared with $14,301,856 in February, 1937. Operating expenses were $14,636,940, against $13,829,962, during the corresponding period of last year.

You'll like the way it snaps you back, overnight, to the feeling of "rarin' to go" fitness and inside cleanliness! Helps eliminate the left-over wastes that hold you back, cause headaches, indigestion, etc. Garfield Tea is not a miracle worker, but if CONSTIPATION bothers you, it will certainly "do wonders!" 10c and 25c at drug-stores — or, WRITE FOR FREE SAMPLES of Garfield Tea and Garfield Headache Powders to: GARFIELD TEA CO., Dept. 14A, 1 Close Avenue, Toronto, Canada.
SHRDL ETAOIN SHRDLU p.k.- SHR

A TONIC AND BUILDER

YOUR health is too important to be neglected. Poor appetite, indigestion, gassy, sour stomach have been relieved by Dr. Pierce's Golden Medical Discovery. Read this: "I had no appetite and was hardly able to sleep at night," said W. J. Winegarden, 467 Main St. W., Hamilton, Ont., "I had become thin, underweight, had no pep or energy and was barely able to do my work. I had acid indigestion quite frequently too. But I felt like eating after I had used Dr. Pierce's Golden Medical Discovery a couple of days. Gradually I gained in weight, had my old-time strength and felt as good as ever." Sold by druggists. Fluid or tablets.

ARICHAT, MAY 14, 1938

NOTE AND COMMENT

Metal bathing suits are the latest fad. No doubt they will be attracted to magnetie gals.

Success seldom sits down and waits for a man to catch up to her, but in the odd case she seems to overtake one man while escaping another.

News of the increased British income tax comes along just in time to cheer up the Canadians whose tax is due the end of the month—a tax much smaller than Britain's, and not to be increased unless all Ottawa guesses are wrong.

The Doukhobors of British Columbia say they don't want their franchise back. They don't want it re-nude?

Canadians eat less mutton and lamb than the people of some other conntries, but that's nothing to feel sheepish about—or for the statisticians to beef about.

A college survey shows that some young people fear they will go insane, others worry because they are not popular. still others are haunted by the suspicion that they are adopted children. Some dread their after-college responsibilities and think they may not be able to make their way in the world. "About ten per cent, of male and female students have a fear of death." Yes, and ninety per cent, drive as though they hadn't.

A contemporary thinks that "one of these days Charlie McCarthy will split with laughter." Wooden be surprised. Some of his opinions are a bit warped as it is.

Ireland has what you might be colleen a pratie fine agreement with Britain.

Narrow shoes gives a man corns on his feet, and narrow views give a man corns on his intellect.

Even the newspaper accompanying Hitler to Rome wear uniforms. And he will doubtless see to it thet their stories are uniform, too; uniformly favorable to the former housepainter.

Dollars and sense don't always keep company.

It is generally conceded that there are too many "isms" in politics; not like the good old times when there were only two: "Is 'm a Grit, or is 'm a Tory?"

Wars used to be fought on land or at sea, but now the sky's the limit.

Time was when parents believed that a switch in time saved nine. Now they never have nine to switch. Two's company; three's a crowd.

Pay as you go is a fine motto. But if some people went as they pay, they'd never be fined for speeding.

Gasoline is being sold at 42 cents a gallon in Ireland. This ought to make the Irish jaunting car more popular than ever.

Men keep turning over new leaves, but they do not find the solution to life's problems. It is in the back of the book, and is only to be found when all life's leaves have been turned.

LOCAL AND GENERAL NEWS

See J. H. LeBrun's new ad. on page 8.

Allan Duggan, lobster buyer, of West Dover, Halifax Co., is in town on his annual buying trip.

Adolphe Boudreau, Sydney, was a motor visitor to town on Sunday, the guest of his parents, Capt and Mrs Alfred Boudreau.

A quantity of haddock was caught in the harbor this week and sold at 15c each for large ones.

C R MacDonald, the well-known contractor of Antigonish, was in town on Saturday and went out to Little Anse to inspect the breakwater there, tenders for which are being called for its reconstruction. If Mr MacDonald tenders for the work, we hope he is awarded the contract, for it could not be placed in better hands.

Josslyn Latimer conveyed Philip Parker, a blind man, to Glace Bay on Saturday to have his eyes examined by Dr Fultz in order to qualify for a federal pension.

Mr and Mrs H C Fixott, Mr and Mrs Oran Coates and Miss Barbara Campbell were motor visitors in town on Sunday.

Mrs Allan D Morrison and Mrs Earle MacDonald, St Peters, were motor visitors in town on Sunday.

The Record office is altogether too small for our staff to work in conveniently. The plant is scattered in different parts of the premises. In order to have the entire plant assembled on the one floor, we are obliged to make an addition to our office. When the work is completed the entrance to the office will be on the eastern side. We hope to have more than elbow room in the enlarged office. The carpentry work will be in charge of Councillor T J Shaw and the masonry work for the foundation in charge of Henry Parker. With electric power shortly to be established, with the power station in the vicinity, we can then operate our presses by electric power instead of by gasoline engine.

Spring, remarks an optimistic paragrapher, is just around the corner. Aha! Perhaps that's where Prosperity got that tired feeling.

The gist of the testimony in a divorce case was that before marriage he chucked her under the chin and afterwards under the table.

Although, of course, it isn't exactly cruel and unusual, the action of a judge, who sentences reckless young motorists to sit and think for an hour, seems pretty drastic. Isn't that demanding the impossible of quite a few of them?

Mr and Mrs C F Latimer, who spent the winter in Boston and vicinity, arrived home on Wednesday.

Miss Jane Mauger, who was visiting her brothers and other relatives at Cape La Ronde for several weeks, returned to Boston on Monday.

Gypsum, it is said, has been discovered on the farms of Howard Latimer and the late Sol Latimer. Samples have been sent to a large Gypsum Co. in England and a report is eagerly awaited.

The copy of the municipal council minutes and reports has been sent to us by the municipal clerk and will be put up in book form with as little delay as possible.

When you know your enemy your course of action is clear. A concealed enemy, who whilst pretending friendship, criticises you behind your back, is a good 'man' to steer away from. The walls have ears and sometimes reveal much of a person's underhanded character, This will be made clear at a later date.

Will there be a Dominion election next fall? There are repeated rumors from high quarters to that effect, but Premier King is not saying anything to deny or confirm it.

Rev and Mrs Kinsman, of Kingston, N S, accompanied by Mrs Minnie Burton and her little grand-daughter Mildred, arrived in town on Tuesday. Mrs Burton will occupy her home here during the summer.

Several fine boats from Port Beckerton, N S, were in port recently and were measured by J L Shaw for tonnage.

Allister McBain, teller in the Royal Bank here, has received word that he will be transferred to the Baddeck branch on May 14. We are sorry to lose him.

A A LeBrun is having his house here renovated and will occupy it in July.

Several farmers on the island have entered the poultry raising industry. Several thousand chicks have been purchased within the past few weeks.

Fred Thurgood, a pre-law student of Dalhousie University, arrived home on Saturday to spend his vacation with his parents, Mr and Mrs A E Thurgood.

Mrs Alexandrine DeCoste passed away on Tuesday morning at the home of Charles DeCoste, with whom she resided for nearly a year. She was 92 years old and was well up to within a few hours of her death. She was a devout member of the Catholic church, Her second husband predeceased her about thirty yeats ago. Surviving her are her step-sons, Arthur DeCoste, Barrachois, Frank and Walter DeCoste, Cape Auguet. The funeral took place on Wednesday morning at the Church of the Assumption, Rev A E Monbourquette, P P, celebrated Requiem High Mass and officiated at the grave.—COM,

Robert Lake arrived from North Sydney on Saturday on a visit to his wife and daughters, who are spending the summer here.

Inverness land sales and an adjourned land sale for the same municipality appear in this issue.

Mrs. A. E. Thurgood and Miss Florrie Bourinot returned on Thursday from a very pleasant trip to Montreal.

F. C. Cotton, St. Peters, was a business visitor to Arichat on Wednesday.

Paul Fougere, merchant, of D'Escousse, was on a business visit to Halifax last week and came back with a new Pontiac car. Mr. Fougere was in town today and gave us a call.

POWDER . .

. . By REX BEACH

CHAPTER VII

Mechanically Ben made an effort to rise, but could not manage it.

"Must have hit on my head," he mumbled thickly, and raised groping fingers. Then he sat up. He knew now that he had not fallen into a pit.

"Where are they? What's — happened?"

Betty was sobbing wildly; her hair hung in a cascade about her shoulders; she was clad only in her nightdress, and it was soaked with the water she had poured over Ben to revive him.

Beside the open door to the hall lay the wreck of a chair; two of its legs were splintered, broken off; Ben realized more clearly now what it was that had crashed down upon his head. With an effort he scrambled dizzily to his feet. Water was trickling into his eyes and blinding him; he brushed it away, then discovered, to his great surprise, that it was not water at all, but blood, his own blood. His head felt twice its normal size; his brain did not function clearly and his limbs refused to obey him.

Betty's voice came to him as if from a long distance; she was telling him something, trying to make him understand that they were alone in the house and that their assailant had fled. When this became plain to Furlong, he sat down.

What Had Happened

It was some time before the girl succeeded in stanching that flow of blood wound, for she was scarcely in condition to render help to anybody. By the time her task was completed Ben had managed to get a pretty clear idea of what had happened. She had been awakened by a sound and had realized that somebody was in her room; she had uttered a frightened challenge, only to feel groping hands upon her, to find herself in the grasp of some unseen person. She retained no very clear recollection of anything after that; the rest was a hideous nightmare. Not until the miscreant had bolted out of the house and she had finally managed somehow to strike a light was she made aware of the reason for his flight. Then she had stumbled over Ben and had realized that it was his voice she had heard calling to her, that it was the sound of his coming that had interrupted the attack. His plight had done a good deal to bring her back to herself, but now she threatened to again abandon her self-control.

Furlong checked this by saying: 'Betty Durham! You've got nothing on but your nightie!"

It was some time later when the girl emerged from her room, dressed after a fashion, to find her deliverer waiting in the kitchen with a scowl upon his face.

"You got a gun?" he inquired harshly.

"No, Ben. Why?"

"I'm going to kill Maddox."

For a moment Betty stared at the speaker; with shaking fingers she plucked at her dress. It was in a thin, reedy voice that she said:

"It wasn't Maddox."

"How do you know?"

"Oh, I know! It wasn't Maddox."

"Are you sure?" The girl nodded, and Ben bowed his throbbing head in his hands. "I'm glad," he groaned. "Providence certainly brought me back. It wouldn't happen that way once in a thousand times. Whoever it was, I'll find him."

Waiting For The Dawn

Both the man and the girl were in wretched condition. The rest of the night they sat together, watching the clock and listening for a possible return of the marauder, waiting for the day to break.

It was shortly after they had finished breakfast that Furlong was surprised to discover signs of activity, movement, goings-on at the well, that caused him to stare fixedly, then to announce, incredulously:

"Say, I believe Maddox is fixing to shoot the well!"

Betty took her place at his side. "Why — he can't! He dassent! The powder men won't be here till to-morrow."

"All the same, he's doing something queer. See those cans — those shiny things?"

"You couldn't hire Tiller to touch nitroglycerine. He's scared of it—"

Ben uttered an oath. "I tell you he's filling those cartridges. He's crazy! You've got to stop him!"

Betty turned white; she shook her head. "I won't go near the place. It's — it's Aunt Mary's well."

"Then I'll stop him. Why, its ten to one he'll sear the rock, ruin the entire job and — Damned if I don't believe he's trying to do that very thing."

Furlong started for the door, but Betty clung to him. When he pushed on past her she followed him. Together they hurried across the field and took the path through the mesquite. As they went the girl continued to implore him not to interfere.

Halfway to the drilling camp they met the engineer hastening towards the farmhouse, and the latter announced, breathlessly: "Tiller's gone plumb off his nut! He's going to shoot the well himself. You better stay clear."

Furlong dashed past the speaker and emerged from the shelter of the bushes in time to see Maddox gingerly swing a long, cylindrical tin over the well mouth and guide it into the opening. A new manila rope had been run through a block on the derrick, and with this he lowered the charge.

Ben yelled at him; he waved his arms. Maddox glanced over his shoulder, then let the line slide smoothly through his hands.

"Take my tip and don't go too close," the engineer shouted. "He ain't no powder man and that well's makin' gas. She blows off every few minutes."

Betty seconded this warning in a frantic tone of appeal: "Let him go, Ben. He knows what he's doing. You have got no right stopping him. You'll just make trouble."

"It's none of my business," the latter agreed, impatiently, "but there's something crooked —" He ceased his speaking; then he seized Betty and he whirled her around with the sharp command, "Run! Get back!"

Coming Up

They were still perhaps a hundred yards from the well, but Furlong's practiced eye had seen something that suddenly raised the hair upon his head. The rope from which was suspened the heavy charge of liquid death no longer hung vertically, it no longer ran over the block and into the casing; instead it was falling in loops about Maddox. It was coming up out of the well.

Maddox himself was alive to what had happened. That which he most greatly feared had come upon him, and he also turned to flee. But the platform was slippery or else he tripped over the rope and fell. The others heard his cry of terror. He quickly regained his feet, but to Furlong it seemed as if his movements thereafter were maddeningly slow and deliberate.

The engineer's apprehensions had been well grounded. Once again gas had been released far down in the earth, and now, like breath forced out of the lungs of some tortured giant, it rose, propelling the smoothly fitting cartridge of nitroglycerine ahead of it as a pea is propelled out of a peashooter. It was a phenomenon by no means unusual in a well as unstable in its balance of forces as this one. In fact, under like conditions none but a madman would have dared to risk Maddox's maneuver.

The latter had not put fifty feet behind him when up out of the well mouth shot the gleaming tin cylinder. Directly above and in its path hung the massive forty-foot steel bit suspended from its wire cable.

(Concluded next week)

British Remedy for RHEUMATIC ACHES

It becomes increasingly obvious that the Rheumatic Sufferers of Canada have for long been seeking a new remedy for their nagging aches and pains. How else can you account for the enthusiastic welcome given to Fynnon Salt, a combination of natural salts of the Earth?

Whenever anyone who is subject to the tortures of Rheumatic Pains decides to take Fynnon Salt regularly, life for him begins to wear a brighter aspect. No longer do the pain-racked joints defy his efforts to secure longed for relief because the corrective ingredients in Fynnon Salt—Sodium, Potassium, Lithium—just won't be defied. Uric Acid can't remain in the system—it has to move on move out.

And sufferers who have turned to Fynnon Salt have had good cause to bless the day they gave it a trial. Wherever the subject of Rheumatic Pains crops up, you will hear the praises of Fynnon Salt sung. Take a ½ teaspoonful of Fynnon Salt in a tumblerful of water every morning for your Rheumatic Pains, Sciatica, Lumbago, etc., and you will soon be rejoicing that life has become bright and cheerful again. Your druggist sells Fynnon Salt, the proven British remedy, 75¢ a large package. If you have any difficulty getting supplies, write: Laurentian Agencies, 51 Gabriel St., Montreal. 1

Cleanliness For Beautiful Teeth

At Least Two Brushings Per Day Necessary, Say Dentists

Lovely teeth are one of the most attractive features of any face, and complete cleanliness is the first step toward toothsome beauty. Though your teeth may not be perfectly formed, through no fault of your own, they can still be attractive and have a unique charm of their own if they sparkle with health and cleanliness.

There are plently of good reasons to give a little thought and trouble to your molars. They should look their best for beauty's sake; they should be strong and white for health's sake; and they should be clean for your breath's sake.

Five Minutes Twice A Day

Your dentist will tell you that three to five minutes twice a day—morning and night—is the minimum number of times you should brush your teeth. And it's a good idea to brush them after every meal if you can possibly arrange it. Brushing should do two things, —cleanse the inner and outer surfaces of the teeth to remove any particles of food that may be in the crevices—and stimulate and massage the gums. This last point is one that the dental profession has been stressing particularly of late.

That old household remedy, bicarbonate of soda, is wonderful for cleaning the teeth, and it will really whiten and strengthen them. So if you have no particular brand of tooth paste, give it a try.

With constant care and proper food you can live to a ripe old age and never have to go shopping for store teeth.

Desserts Made With ORANGES

Do you remember the old Greek legend about Hercules and the golden apples of Hesperides? It is generally believed now that those golden apples were really oranges, the oranges of Spain which were remote and mysterious wonders to the Greeks at that time. It is a very picturesque story — how Hercules was sent to get the golden apples from the Hesperides but had to ask the help of Atlas, the mighty man who held the heavens on his shoulders. But Atlas was pretty well tied up with supporting the heavens so a bargain was struck whereby Hercules took over the burden while Atlas went after the prize.

The casualness with which they tossed the heavens from one to another in those days seems amazing, but no more amazing than the casualness with which we obtain oranges today would have seemed to the Greeks. This once rare fruit comes to us now from much greater distances than the Greeks ever conceived of. Besides the fruit from the United States which Canadians have been eating for many years, we get beautiful oranges from Palestine and the Orient.

Here are two desserts made with a basis of quick-cooking tapioca cream combining eggs, milk, tapioca and oranges to make a wonderfully nutritious dish. Among other food values, oranges contain iron, one of the few elements which milk lacks, so altogether the balance is perfect.

Orange Tapioca Cream

1-3 cup quick-cooking tapioca
½ cup sugar
¼ teaspoon salt
4 cups milk, scalded
1 egg yolk, slightly beaten
1 egg white, stiffly beaten
1 teaspoon orange or vanilla extract
4 oranges, sections free from membrane.

Add quick-cooking tapioca, sugar, and salt to milk, and cook in double boiler 15 minutes, or until tapioca is clear, stirring frequently. Pour small amount of tapioca mixture over egg yolks, stirring vigorously. Return to double boiler and cook until thickened. Remove from fire; fold in egg white and flavouring. Place few sections of orange in bottom of individual serving dishes and cover with the tapioca mixture. Garnish with additional orange sections and whipped cream if desired. Serves 8.

Chantilly Orange Tapioca

4 tablespoons quick-cooking tapioca
¼ teaspoon salt
1 1-3 cups boiling water
½ cup sugar
1 cup orange juice
½ grated orange rind
½ cup cream, whipped

Add quick-cooking tapioca and salt to water, and cook in double boiler 15 minutes, or until tapioca is clear, stirring frequently. Add sugar, orange juice, and orange rind. Cool. Fold in whipped cream. Chill until thickened. Pile lightly in sherbet glasses. Just before serving garnish with very fine ¼ inch shreds of orange rind.

Gloves Crocheted In Two Pieces Easily Made Says Laura Wheeler

A smart "finishing touch"—gloves crocheted of inexpensive cotton! Pattern 1731 contains directions for making the gloves in small, medium, and large size (all in one pattern); an illustration of them and of stitches; materials required.

Send 20 cents in coins (stamps cannot be accepted) for this pattern to Wilson Needlecraft Dept., 73 West Adelaide St., Toronto. Write plainly Pattern Number, your Name and Address.

Catalog Of Don'ts For Perfect Wife

Here's what the perfect wife should not do, according to Dr. Ethel Dukes, co-director of a child psychology institute in London.

Dr. Dukes, in a speech on "The Successful Wife," listed these "don'ts" for a woman who wants to make a good job of marriage. Such a woman, she said, will not:

Domineer her husband.

Criticize him in presence of others.

Insist on changing him.

Refuse to be friends with his friends.

Try to show him off.

Make him a cushion carrier or an additional servant.

Insist on constant entertaining in the house and out of it when he is tired and wants his cosy slippers.

Despise his homespun qualities when she has had time to improve her cultural and social qualities while he has been hard at work.

Run down his mother or other relatives.

Get into debt.

Neglect him while she runs after "higher things."

Refuse to have children if he wants them and there is no medical reason why she should not.

Use any feminine wiles or neurotic illnesses to make him subservient to her.

WAKE UP LIKE A CAVE MAN

Feel Full of Life—No More Tired, Dull, Heavy Mornings

Keep your liver healthy and you'll feel great every morning. When you wake up feeling "rotten" your liver is out of order. Your liver clears the blood of poisons, separates the nourishing part of your food from the waste. Supplies energy to muscles, tissues and glands—gives out bile, the body's laxative, helps stomach, kidneys and intestines to work properly. A mere bowel movement isn't enough. "Fruit-a-tives" made from fruits and herbs, will strengthen and build up your liver like nothing else will. You'll be amazed how well you are every morning. Try Fruit-a-tives. All druggists.

FRUIT-A-TIVES LIVER TABLETS

Suitor Engages Sorcerer's Aid

Italian Wooer Attempts to Win His Girl By Magic

When his wooing and wealth failed to make any impression on a 20-year-old girl with whom he had fallen in love, an 82-year-old Italian enlisted the aid of a sorcerer to try and win her love. No he has enlisted the aid of the police to try and find the sorcerer.

The old man and the girl met on board a liner on which he was returning to Italy from America. He fell in love with her, and when she left the boat at Naples he left also. At Resina, near the foot of Vesuvius, he took lodging not far from her home.

"Be Patient"

Insistently he tried to win her attentions—but in vain. At last he went to a sorcerer who lived nearby. The sorcerer told him to buy a magnificent house near the girl's home, furnish it luxuriously, and then wait. The old man did so. She did not come.

The old man went again to the sorcerer. "Be patient," he was told. "She will come tonight. Go home and prepare a magnificent supper, with champagne and flowers, and await her."

Back For More Advice

Again the old man followed the sorcerer's instructions—and again, disappointed, he returned for more advice. This time he was told to get some pills and take injections. Still the girl did not relent.

The next day he informed the police. But when the police went to arrest the sorcerer they found that he had vanished — with numerous valuables belonging to the old man and $25,000 which he had been persuaded to hand over to the magician.

Being Hostess, Cook Combined

Advice Contains Many Kitchen Tips That Result In Smart Serving

Many women have to play the role of hostess and cook at the same dinner. They realize the necessity for serving meals without the constant bobbing up and down from the dinner table to the kitchen that is disconcerting to guests as well as the hostess. Dorothy B. Marsh suggests in Good Housekeeping ways to serve efficiently and cut down on these trips to and from the kitchen.

Save Steps

"Suppose, for instance, you're to have tomato or fruit juice for the first course," she says. "Save steps by serving it with the main course. Then when it comes to vegetables, choose two that you can combine in one serving dish or arrange side by side on it. Serve one vegetable on the meat platter when you can. Or make vegetables a part of a honey main dish in a casserole."

Also, suggests Miss Marsh, share honors with the host in serving everything from the table. In this way you'll save many kitchen trips. And always dine with a small table or tea wagon on hand. Use it to serve from, or for dessert things, or water pitcher.

Rose oil produced in Bulgaria last year weighed 6,105 pounds.

NERVES

STOP THEM SCREAMING!

If you worry—with that queer taut feeling in your stomach—take PHOSFERINE. A few tiny, economical drops each day will help steady those ragged nerves, improve your appetite, build up your strength. At druggists, 50c, $1.00 and $1.50. 68

PHOSFERINE THE GREAT NERVE TONIC

CHILDREN of all ages thrive on "CROWN BRAND" CORN SYRUP. They never tire of its delicious flavor and it really is so good for them—so give the children "CROWN BRAND" every day.

Leading physicians pronounce "CROWN BRAND" CORN SYRUP a most satisfactory carbohydrate to use as a milk modifier in the feeding of tiny infants and as an energy producing food for growing children.

Foster Parenthood Worthwhile Career

Permanent Attachment Often Develops From Relationship

A list of careers open to persons past 40 should include foster parenthood, according to the committee on foster home care of the Chicago Council of Social Agencies. The committee, which is launching a movement to acquaint the public with the opportunities of this career, cited cases of persons who had found when they took under-privileged children in to board, not only cash remuneration, but usefulness and scope for talents in home-making.

Made It A Vocation

Permanent attachments often develop from the foster-mother relationship, said Leon H. Richman, the chairman of the committee and superintendent of the foster home department of the Jewish Children's Bureau.

Mrs. Bertha H. Butler, representing the Chicago Orphan Asylum on the committee, related a case in point, that of a foster mother, now deceased, who built a monument for herself in the remembrance of those whom she befriended. This woman made foster motherhood a vocation.

Walks Barefoot In Snowdrifts

For 27 years or more, winter and summer, Oren (Ginger) Young of Midland, Mich., has been taking a fifteen-minute walk barefoot daily. And in all that time he never has been ill a day.

"Apples, tomatoes and humans need air," Young explains. "Put apples in a hot room without fresh air and they rot rapidly. Give them air and they keep good for a long time."

One of Young's stunts, which sometimes amazes visitors to the town, is shoveling the snow off his front walk while barefooted and dressed only in light shirt and trousers.

"Of course, I wear an overcoat and protect myself from the cold like other folks, but not during my fifteen-minute daily airing-off period," Young adds.

Young, 59 years old, believes one reason he values fresh air so highly is that he spent his youth in the coal mines where fresh air just doesn't exist.

Sunday School Lesson

LESSON II
FINDING OURSELVES IN SERVICE—Mark 8:27-38

Golden Text.—What doth it profit a man, to gain the whole world, and forfeit his life? Mark 8:36.

THE LESSON IN ITS SETTING

Time.—Autumn, A.D. 29.

Place.—Near Caesarea Philippi, far north in Palestine under Mount Hermon, a few miles east of the city of Dan.

27. And Jesus went forth, and his disciples, into the villages of Caesarea Philippi. This town is to be distinguished from Caesarea on the coast, the seat of the Roman government, where Paul was imprisoned. It was situated at the most eastern and chief of the two recognized sources of the Jordan on a rocky terrace under Mount Hermon, a few miles east of Dan, the old frontier city of Israel. And on the way he asked his disciples, saying unto them, Who do men say that I am? Jesus is not asking for information for himself, for he knows the different opinions of men. What he wants is to have the disciples state the wrong opinions of men in order to set against them their own right conviction.

His Identity

28. And they told him, saying, John the Baptist; and others, Elijah; but others, One of the prophets. John stood for purity of character, Elijah for power with God, and the prophets for proclamation of the truth. Christ stood for all these—and for more. These were all good, but not good enough. Four conclusions are to be drawn from this statement of the disciples: men were discussing Christ; men were not able to agree as to who Christ really was; all men agreed that he was a great person, like unto Israel's greatest characters; most men were wrong as to their conclusion regarding the identity of Jesus.

29. And he asked them, But who say ye that I am? The emphasis here is certainly on the word "ye." The disciples had been with Jesus now for two years, and if they did not by this time know who he was, they never would. Peter answereth. And saith unto him, Thou art the Christ. The Jewish people for centuries had been looking for the Messiah ("Christ" is the Greek word for "Messiah") promised in the Old Testament Scriptures. Only one Messiah would ever appear; he would be their last prophet, their perfect priest, their omnipotent and eternal king. Peter was convinced that Jesus was the long-looked-for Messiah, and that conviction has been the faith of all true Christians ever since.

30. And he charged them that they should tell no man of him. The disciples' faith was weak and their knowledge small; the Holy Spirit had first to come to teach them about Jesus ere they could rightly proclaim the Messiah.

31. And he began to teach them. By "began" is not meant that he had never before spoken of his sufferings, or intimated the coming cross, but that now, and from now on, his instruction was to be precise and detailed." That the Son of man must suffer many things. Our redemption is derived from Christ's sufferings and death, and Christ is compelled to suffer and to die only because he is determined (because he loves us) to redeem us from sin and give us eternal life. And be rejected. The verb here translated "rejected" means to reject after submitting to a test. Jesus will be rejected by no less an authority than the Sanhedrin, the highest judicial and religious authority of the nation. By the elders and the chief priests, and the scribes. The three classes together constituted the Sanhedrin or supreme council of the Jews. And be killed, and after three days rise again. Here are at least five different definite predictions which no man could make concerning himself except with superhuman knowledge.

Peter Rebukes Him

32. And he spake the saying openly. And Peter took him, and began to rebuke him. The reason why Peter began to rebuke our Lord was that he could not conceive of one who was the Christ of God suffering violent death at the hands of such hypocrites as those whom Jesus had designated to be his destroyers.

33. But he turning about. Jesus, as he turned, caught sight of the rest of the Twelve, who were probably watching the scene with interest, and perhaps shared Peter's views. A public reproof was therefore necessary. And seeing his disciples, rebuked Peter, and saith, Get thee behind me, Satan. Jesus uses to Peter the very words he spoke to Satan in the wilderness of temptation, for the apostle was tempting his Master with the same temptation. Peter proposes Messiahship without suffering and death. Jesus does not mean that Peter is really Satanic and depraved, but that in urging Christ to shrink from death he is taking, unconsciously, the part of the tempter and is siding with man, not with God. For thou mindest not the things of God, but the things of men. Peter was setting his love for his Master in opposition to God's love for his Son and for his sons.

Life's True Values

34. And he called unto him the multitude with his disciples, and said unto them, If any man would come after me, let him deny himself. Christ had just spoken to the disciples about his cross, and now he tells them that there is also one for each of them, if they are true to him. A disciple who denies himself must give up self-worship and self-will. He must love God with all his powers and his neighbor as himself; against these claims his own interests must be set aside. And take up his cross, and follow me. This is the extreme phase of the self-denial which Jesus has just commanded. Let him deny himself and carry out that self-denial even to death.

35. For whosoever would save his life shall lose it; and whosoever shall lose his life for my sake and the gospel's shall save it. These solemn words are used by our Lord on four separate occasions — Matt. 10:39; Luke 17:33; John 12:25, and here.

In the first clause, the word "life" means the bodily life, and in the second the true life of the spirit. Our Lord's statement here means that when a man deliberately sets out to keep his life to save his life, to preserve his life, no matter at what cost, he is going to lose it, for he has failed to identify himself with anything that abides, and when a man, for the sake of Jesus and his gospel, is willing to give up everything, even his life, he has thereby saved his life, for he belongs to Christ, and, in Christ, he has eternal life.

36. For what doth it profit a man, to gain the whole world, and forfeit his life? The whole world, when put in one scale, is lighter than a feather when the soul is in the other scale. The material and transient on the one hand, and the spiritual and eternal on the other hand, are utterly different values, and can never be chosen together.

Losing One's Life

38. For whosoever shall be ashamed of me and of my words in this adulterous and sinful generation, the Son of Man shall be ashamed of him, when he cometh in the glory of his Father with the holy spirit. Now Jesus Christ said there were men in his age who were ashamed of him and his words. Why? Evidently because both he himself, and his teaching, set them in such light as to reveal by contrast their failure. Again, they were ashamed to follow him because in his life and teaching he attacked their prejudices. We may go further still and say that men were ashamed, and are still ashamed of Jesus, because he calls to definite and positive change of life. If we are ashamed of him, says the patient, gentle, tender, beautiful, strong Son of God, there is a day coming when he will be ashamed of us, ashamed of us because we, ashamed of him, will have chosen the pathway that leads to destruction of character, and therefore to destruction of life.

Rumanians Learn English Language

So popular has the English language become in Bucharest that special schools are being organized to cope with the thousands who wish to learn it. Contrary to the general opinion on the Continent, Rumanians say English is an easy language to master. But they are notably adept at learning foreign languages.

One reason for the boom in English study arises from the films. Cinema-goers form a large proportion of the pupils. Others are studying English because it is being used more and more in business, diplomatic circles, and society abroad.

Granite is one of the oldest of our rocks, and many other rocks have taken their materials from it.

IS THIS YOUR BIRTHDAY?

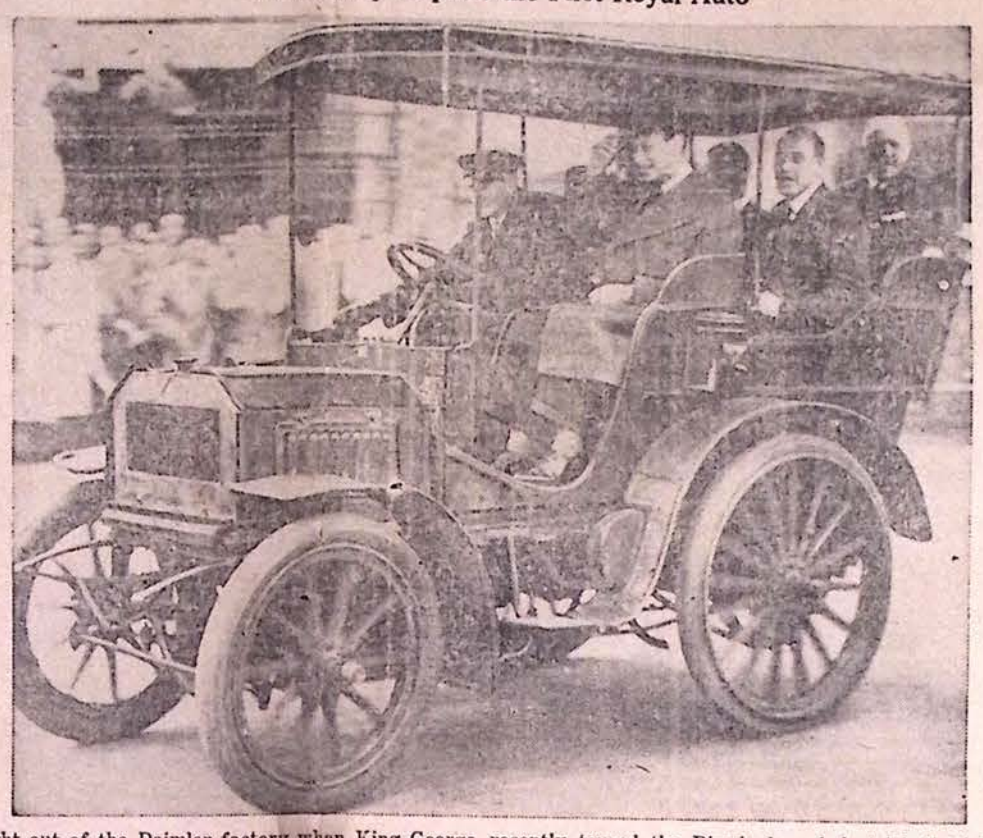

By A. R. WEIR

What the Stars Foretell for Those Born on April 8, 9, 10, 11, 12, 13 and 14th

Zodiac Sign—Aries

You are intensely ambitious and desire a position of honour in the world. You are likely to go abroad and may not remain in one place for any length of time. Peace and quietness are necessary to you. A disappointment is shown in love matters but you should overcome some financial difficulty and have clear sailing.

His Majesty Inspects the First Royal Auto

Brought out of the Daimler factory when King George recently toured the Birmingham industrial district, the six horse-power chain-drive 1899 model built for King Edward VII performed remarkably well when His Majesty took a spin around the block. Lord Swinton is seen sitting behind the King, who apparently derived much pleasure from riding in his grandfather's automobile, the first ever built for a monarch.

Alarming Increase Seen In Mental Afflictions

Governor-General Refers to Strain of Modern Life And Its Result at Annual Meeting of Canadian National Committee for Mental Hygiene.

The strain which modern life puts on the mind is so heavy that there is an alarming increase in the number of people who are suffering from mental disabilities, and Lord Tweedsmuir, Governor-General, speaking in Montreal, at the 20th annual meeting of the Canadian National Committee for Mental Hygiene, praised the educative work that is being done by this organization, outlining also the principal tasks it must undertake to combat the strain, and aid in the proper training of youth for the struggle of life.

"One is forced to the conclusion," said the speaker, "that there is that in our modern life which puts a far heavier strain on the mind than anything our grandfathers knew."

"What is the cause?" Lord Tweedsmuir continued. "Many causes, I think. Partly the terrible social derangement of the War, the effects of which are by no means exhausted. Partly the unsettlement of the world which infuses in certain temperaments a perpetual nervous fear. Partly the fact that the scientific apparatus of life has been so speeded up and elaborated, and that human nature has not yet fully adjusted itself to it. Partly the decline of religion, which gave our fathers a shield against the buffets of fate."

These conditions are common to all the world, but in Canada we have certain special causes—extremes of weather which put a strain on the nervous system, violent economic ups and downs, the loneliness which afflicts people dwelling in the wilds far from neighbors. It is a problem which touches every civilized nation and Canada assuredly is not immune from it. I am told in this Dominion there are more hospital beds for the mentally afflicted than for all other types of illness put together. Thirty thousand people are being treated at this moment in mental hospitals at an annual cost of more than ten million dollars. Out of every hundred children now in our schools four, under present conditions, are doomed to suffer from mental ailments. There can be no doubt about the urgency of the problem.

Interpret Health In Wide Sense

"We are beginning to interpret health in a wide sense—health of the mind as well as of the body. We are coming to realize more and more the intricate connection between body and mind, that physical well-being is nothing unless it is accompanied by mental well-being, and that the latter is the more vital since it is the more fundamental.

"A variety of wholesome interests must be stimulated in children to forestall the development of unhealthy ones. This might mean a great saving to the nation of valuable brains, as well as mere material economy.

Off To Tennis Wars

Helen Jacobs, California tennis star, sails from New York ahead of the Wightman Cup squad, to polish up on her play, abroad. The others will sail in May.

Southpaws Work Under Handicap

Because the World Appears to Be Arranged for Right-Handed People

This is, definitely, a righ-handed world, writes Ann Rutherford in the Stratford Beacon-Herald. Nobody pays much attention, of course, until some day that right arm decides to go on a holiday and let the left arm take the lion's share of the work. Then is born the resolution to spend a little more time training that left arm.

Early in the morning the trouble starts. The comb scratches. The brush snarls. Even the toothbrush objects to starting its job from the opposite side of the mouth.

That Coffee Cup!

Then there's the coffee cup at breakfast. Nice, pleasant cup, companion of a hundred hours. But right-handed hours. It refuses to co-operate when the sugar is stirred. Its handle interferes when the spoon goes into the saucer.

The sink is worse. The drain-board is on the wrong side entirely. Dishpan and rinsing pan are lined up awkwardly. The dish towel is constitutionally opposed to changing its mode of operation.

A ray of hope comes from the telephone. It isn't so bad, receiver fitting nicely into left hand as usual. But when a message must be written down, even the telephone joins the right-hand ranks and rebels.

As for typewriter, notebook, pen and pencil, they too are adapted for anything but left-handed service. All the useful letters of the alphabet seem to move over to the right side of the typewriter. The shadow of a hand falls on the notebook slanted the opposite direction.

In short, the world is distinctly unfair to southpaws. What can be done about it is another question for the League of Nations to puzzle out.

May flies spend from one to three years as water crawlers, only to die after the first night as winged adults.

Approximately 191,000 dry oil wells have been drilled in the United States.

Use More Science To Combat Crime

Royal Canadian Mounted Police Are Very Up-to-Date In Their Methods

Aided by modern scientific and aviation technique, the Royal Canadian Mounted Police plan a renewed campaign under vigorous new leadership to combat crime in Canada.

A science laboratory is being developed at Regina under direction of Dr. Maurice Powers, one of the most eminent criminologists on the Continent. This will provide a centre for R.C.M.P. scientific efforts to fight murderers, counterfeiters, thieves and smugglers in the fashion of the renowned United States Federal Agents—the G-men. It is the latest advance in the dramatic history of the Dominion's most famous police organization.

Ultra-Violet Ray

Colonel Wood, formerly head of the Criminal Investigation Branch, and now Chief of the "Mounties", points with pride to such scientific instruments as the ultra-violet ray lamp, the comparison microscope and the spectograph, used by the force in criminal investigation.

The ultra-violet ray lamp is rapidly becoming increasingly important for scientific detection of crime. With it, stains on clothing or walls can be examined which are invisible to the naked eye. The comparisons microscope enables comparisons of bullets, cartridge cases, seals, stamps and fabrics to be made with the original, while the spectrograph is an instrument used for detection of counterfeit coins.

The new Commissioner forecasts the airplane will have an increasingly important place in the development of the force, which now polices the three Prairie Provinces, the Maritimes, the Northwest and Yukon territories.

"At present our air force is concentrated on the East Coast and used for observation purposes in spotting rum-runners, but we hope to have a plane operating in the Northwest Territories soon and eventually one on the Pacific Coast to watch for narcotic smugglers as the liners come in from the Orient, a duty that has been performed by the Royal Canadian Air Force," he said.

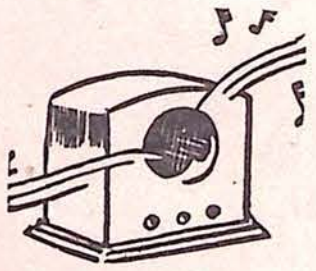

Printer Can't Read

A type-setter on a Centreville, U. S.A., paper has held the job five years, though he cannot read or write. He recognizes the letters by their shape.

Comedian Arrives In New York From Coast

Drawing allegedly dulcet tones from that constant companion, his violin, Jack Benny, radio comedian, arrives in New York for a brief visit. Benny will return to Hollywood quite soon.

Around The Dial

RADIO HEADLINERS OF THE WEEK

By FRANK DENNIS

HOLLYWOOD HOTEL

Frank Parker, one of radio's top ranking tenors has just been signed to M. C. the Hollywood Hotel program in place of Jerry Cooper. This is Parker's first series of programs since last November. During the past several months, he has been on practically every important program as the guest star, and has been studying for the opera. However on the Hollywood Hotel program he will be heard in semi classical and popular songs.

No program for children on the North American continent has ever won the same kind of enthusiastic following as the Air Adventures of Jimmie Allen. The lovable character of Jimmie himself, the splendid manhood of Speed Robertson, the really thrilling nature of each episode and the complete absence of anything horrible or shocking have each helped to make Jimmie Allen a household word. Genuine flying lessons both over the air and distributed to members of Jimmie Allen Flying Clubs, real information about aviation, instructions and assistance in building model planes, all these give the children real and valuable spare time occupation, and have won Jimmie Allen the endorsement of parent-teacher associations, welfare organizations and educational authorities. The story begins with Jimmie Allen employed as a messenger boy at an airport. He stumbles on a plot to hold up an airliner with a big shipment of currency. If you would like to know just what happens — listen to CBL or CKLW 5:45 to 6:00 p.m. or C B O, 6:00 to 6:15 p.m.

Hal Kemp's orchestra with soloists Maxine Gray and Bob Allen will head the new Time To Shine musical over the C. B. S. network, Tuesdays 10:00 to 10:30 p.m. beginning April 19th. The broadcasts will feature the popular Kemp style of dance rhythms and personalized arrangements of new and old songs by Allen and Miss Gray. Saxy Dowell, rotund, comic saxophonist, and Eddie Cusby, trombonist will be on hand with a bagful of instrumental tricks to present each week. Kemp's band just completed working in the film Radio City Revels.

NEW SET-UP

Benny Pollack and his orchestra with the glamorous Paula "peegee" Gayle will replace Jimmie Grier's music on the Joe Penner broadcasts over C. B. S. Penner will be assisted on the program by an able cast of actors and stooges including Martha Wentworth as his mother, Dick Ryan as the butler, Roy Atwell whose tongue gets all twisted around his eyeteeth and he can't see what he's saying, and Gay Seabrook, as Penner's Suzabella. Gene Austin tenor will share songs with Peegee Gayle.

Kate Smith, the Washington girl who rose to fame via radio, stage and screen entered a new field on April 4th when she made her debut as an air columnist over C. B. S., 3:30 to 3:45 p.m. She is now heard every Monday, Wednesday and Friday. Miss Smith will continue as Mistress of Ceremonies on her Thursday night program.

-News of the County Districts-

Petit de Grat News Items

(By "Observer")

Some of the canneries boiled twice the past week. They will be in full operation this week. Lobsters are rather scarce, but the canneries buying from so many fishermen through their smackmen doing the coast manage to keep going most of the time.

In notes of last issue: At Loggie's cannery, the engineer and operator of large sealing machine should have read Remi R. Boudreau, and the operator of small sealing machine, Miss Cecilia David.

Godfrey Boudreau, Arichat, is again smackman for the Richmond Shorefish, Ltd, this sprig. Alnphonse Boudreau and Jeffrey Landry are the smackmen at West Arichat and River Bourgeois respectively.

Harry S. Boudreau is now at Camp Hill Hospital, Halifax to undergo examination. He is a returned soldier and served in the World War.

The motor boats Lulu B. Capt. Jeantie H. Beudreau, and the St. Anne II, Capt. Tommy Marchand, have returned from St. Anne's, C. B. with bait for the Rienmond Shore[illegible], Ltd.

Miss Mildred LeBlanc arrived from East Boston on Tuesday after an absence of nine mon[illegible]s. She is a guest of her parents, Mr. and Mrs. Michael LeBla[illegible].

Miss Edna Landry, who has been employed in Sydney for over two years, arrived home on Tuesday and is not in the best of health.

The motor boats Elizabeth II, Capt. Louis Samson, and the Mary R. II, Capt. Gerald Richard, expect to sail for Newfoundland this week to engage in smacking lobsters on that coast.

Born, on April 28th, to Mr. and Mrs. Simon D. Boudreau, a son. Also to Mr. and Mrs. Walter D. Boudreau, recently, a son—Omer.

Alex A. Boudreau and Nicholas Landry left for Fourchu where they will engage at lobster fishing.

Joseph T. Boudreau, manager of the Richmond Shorefish, Ltd. left on Tuesday on a busine[illegible]s trip to Canso in the interest of the firm.

Andrew H. Boudreau is buying lobsters for the American Fish Company, of Boston, Mass.

Walter S. Hallett and a Mr. Pine, of Boston, who called here the past week, have returned to Boston.

PONDVILLE NOTES

A large number of traps have been set by the lobster fishermen who report a small catch of crustaceans.

Mr. and Mrs. William LeVesconte and their son Peter, were motor visitors from River Bourgeois Friday.

Miss Rita Landry, was visiting Miss Irene Fougere recently.

Mrs. Thos Bowen, left for St. Martha's Hospital, to undergo an X-ray.

An old respected citizen of Rocky Bay, Patrick Kehoe, passed away at his home on Thursday last. He leaves his wife and several children to mourn his death.

James Briand, of Poulamon, was a visitor here on Friday.

E. E. Boudreau, representing Conley & Dagget, paid a visit to the fishermen of this community during the week.

Mrs. Wm. Dunphy, left for River Bourgeoise Thursday to visit her daughter, Mrs. Peter LeVesconte.

Miss Minnie Briand, is visiting her sister in Poulamon.

"The FIRESIDE PHILOSOPHER"

By ALFRED BIGGS

Nobody loves an egotist.

• • •

Wisdom is better than wealth.

• • •

Waste no tears over yesterday.

• • •

It is often harder to live than to die.

• • •

We are all slaves to habit and custom.

• • •

Ignore misfortune and it will ignore you.

• • •

A mind perennially young is a fountain of youth.

• • •

Aged war-makers demand young victims.

Get The Best!

Buck That Cough or Cold With Buckley's

It costs only a few cents to knock out a cough or cold with BUCKLEY'S MIXTURE, because Buckley's is so supremely good that only a few doses are needed to subdue the toughest cough or cold. And Buckley's can be diluted with three times its volume of water making it go still further.

Will not upset your stomach. Just safe, sure, instant relief from coughs, colds, 'flu or bronchitis. Play safe. Refuse substitutes. Buckley's is sold everywhere.

The Farmer's Son Has His Say:---

"What about that Agricultural College Course, Dad?"

"A little early to talk about it, isn't it? Besides where are we going to get the money?"

"Now is the time to start planning, Dad. If we could grow more of our own feed, fertilize some pasture to keep the cows milking full time, and raise a few more hogs and more poultry, that would help produce the extra cash. We could make a start anyway this season."

"That sounds good, son. Should have done it before. I'm with you on it. Let's try it out."

"Besides, Dad, it doesn't take much money. No tuition fees. Just enough for room and board and books. And two years at Truro is sure going to mean a lot to me because I want to be a good farmer and a good citizen."
