Special Meeting of Council Held At St. Peter's

A Special Meeting of the Municipal Council of the County of Richmond met at St. Peters on Monday, July 11th.

The meeting was presided over by Deputy Warden John Doiron, in the absence of Warden John W. Sampson who is at present in the province of Ontario.

• • •

ASSESSOR APPOINTED

The first order of business on the agenda was the appointing of a General Assessor.

Municipal Clerk E. C. Doyle presented one application for the position, in the name of Joseph Mury of West Arichat.

As Mr. Mury was the only applicant on motion of Coun. B. S. Langley an interview took place with Mr. Mury after which his appointment was ratified by the Council.

• • •

IMPERIAL OIL CO., GRANTED PERMISSION TO IMPROVE PRESENT INSTALLATIONS

Permission was granted the Imperial Oil Co., to enlarge their installation at St.. Peters for the storage of oil and gasoline.

• • •

TENDERS NOT ACCEPTED

The second order of business was the opening of "Tenders" for the sale of the St. Peters County Hall and "Lock-up".

The only tender for the purchase of the Hall came from Zelanda Mancini offering $600. The Council felt this was too low a tender and after some discussion it was decided to withhold the sale of this building.

Two tenders for the "Lock up" were presented and here again it was felt that the building is serving a need in the community and would not be disposed of at this time.

W. N. MacDONALD ADDRESSES COUNCIL ON INDUSTRY FOR COUNTY

Mr. W. N. MacDonald of Sydney addressed the Council on the possibilities of a steel mill and chemical plant for the Strait of Canso area. Mr. MacDonald outlined the coal resources of Inverness County and the harbor facilities for shipping coal and steel at Point Tupper.

In his talk to the Council Mr. MacDonald was not extravagant with his statements, but carefully viewed the Strait of Canso possibilities as a great centre for any industry that would be willing to establish there.

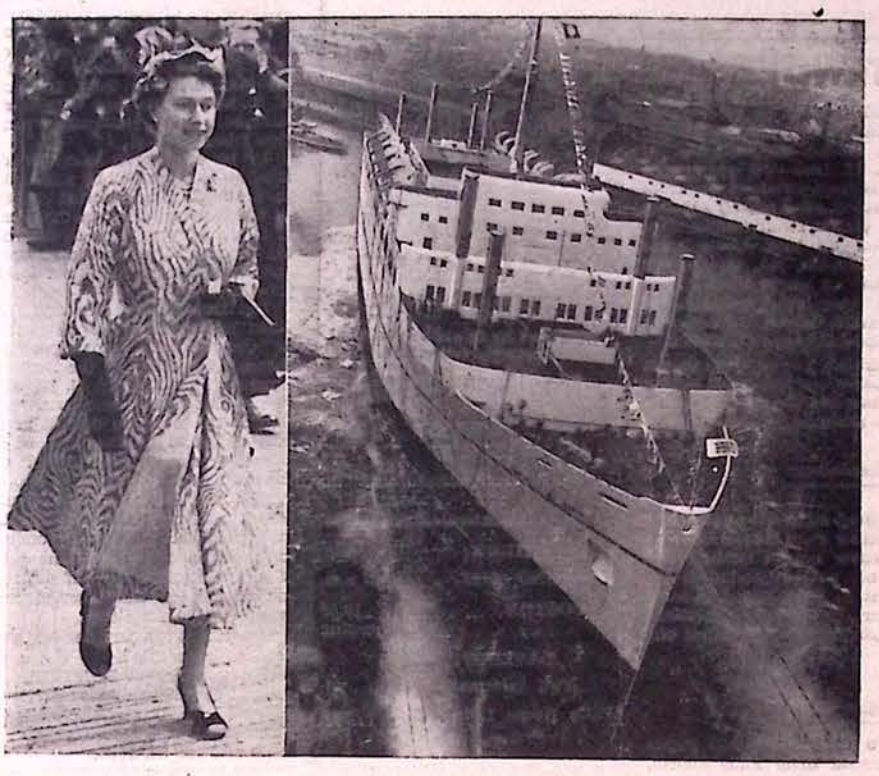

Mr. MacDonald said that he felt a company from Europe would be willing to establish a plant in this area provided the raw material would meet with their approval. He also stressed that every consideration in respect to taxation would be a factor in favor of establishment of such a plant.

Mr. MacDonald's talk was most interesting and sincere and it was gathered that much time, effort and expense was made over a period of time to bring together such an encouraging and well directed report.

A motion was adopted by Council giving every consideration in respect to taxation in the event of the establishment of a permanent industry in the County.

A hearty vote of thanks was extended to Mr. MacDonald by the Council.

MAIDEN VOYAGE NEXT SPRING

Hundreds of workers, representing dozens of specialized trades, are putting the finishing touches on the 24,000-ton Canadian Pacific liner "Empress of Britain" in readiness for her maiden voyage in the Spring of 1956. Launched June 22 by Her Majesty Queen Elizabeth at Govan on the River Clyde, the newest of the Great White Empress fleet is now being outfitted at the quayside. Of modern design, the vessel will carry 1,050 passengers her North Atlantic travel route between Liverpool and Montreal.

Very Rev. A. P. Poirier, President of the Bicentenary Acadian celebrations at Arichat on July 31st reports that preparations are now in progress and requests the co-operation of everyone to help make this celebration one of the most outstanding in the history of Arichat.

A program will be published in our next issue.

Hon. R. H. Winters Reports From Ottawa

July 9, 1955

Dear Mr. Editor:

The main theme in Parliament again this week was the debate on the Defence Production Act. There were several steps taken by the Government to meet, at least in part, the points being raised by the Opposition, but to date there is still no indication of when the debate will end.

It seemed to Members of the Government that the concessions being offered provided more opportunities for Parliament to scrutinize and control the powers of the Department of Defence Production than the Opposition is, in fact, seeking. Mr. Drew and his supporters to date have thought otherwise and it remains to be seen just what approach they will take when the discussions resume next week.

Once again our ferries have been the subject of questions in the House. With the Harbour of Port aux Basques being considered by the Canadian National Railways to be unsafe in some weather, the question arose as to where the new "William Carson" would operate in the meantime.

Also we were all very disturbed to learn that tht "Bluenose" has encountered some trouble, which might result in further delay. According to the Minister of Transport certain of the gears proved to be defective during the dock trials and this will delay for some two weeks the date on which the ferry can be turned over from the shipbuilder to the Canadian National Railways It's not clear yet how long this will actually defer the date of inauguration of the ferry service, but we have been told that the shipyard is rushing the repair work by every means possible.

I spent most of the week travelling throughout Western Canada, where I had an opportunity to visit in Winnipeg, Maple Creek, Saskatchewan, and Medicine Hat and Lethbridge in Alberta. The West has had a wet season and there is much more water on the land than usual. There is considerable apprehension amongst the farmers about the wheat crop again this year, and especially they fear rust, which always seems to develop in wet seasons. In some areas farms are still under water and it has been impossible to do any seeding.

Visits such as this always impress one with the magnitude of the county and the variety of problems that are encountered. Under it all is a broad and stable basis on which the prosperity of Canada is built and which prompted the headlines in the Montreal Gazette this morning "Economy Strongest in History."

Yours very truly,

ROBERT H. WINTERS

Sporting Mountain Echoes

Our good dog met violent death the other day under the wheels of a passing pit-prop transfer.

Of pretty and prepossing appearance and disposition he was rarely intelligent and trusty; and under the peculiar conditions we live, move and have our being in our little domicile by the roadside, we have occasion to be sorry for "HUSKEY".

The long holiday week-end brought the usual influx of visitors to the summits and slopes of Sporting Mountain.

Our Sunday callers comprised Mr. and Mrs. John N. Morrison, St. Peter's; Mr. and Mrs. Arthur Pate (Esther Morrison) and family of Halifax; Mrs. Vitus Burke (Irene Morrison) and son Daniel Josep, River Tillard; and Jack Madden of Thibeauville.

Our Monday quota from down Sydney way included Mr. and Mrs. Robert Lewis and sons, Robert jr. and Ronald accompanied by their good neighbour, John Inkpen; our old neighbor, the veteran Frank Burns (82) and his interesting son, Walter, whose acquaintance we were pleased to make.

Mrs. Russo (Laura Campbell), of Dundee, and her aunt, Margaret McLean, were among others who made transient contact.

Whilst John Inkpen and Jas. Sutherland were angling at Seaview Lake, we accompanied Mr. and Mrs. Lewis to "Road to the Isles".

At The Strait we visited briefly at the spacious and up to date home of Mr. and Mrs. D. R. Mc Donald.

Lucille Martell of Little Anse, was a Sunday guest at the Boudreau home.

The likeable Tony Konning has gone to Montreal to seek employment.

Everybody who knew Tony will wish him well.

Mr. and Mrs. Leonel LeBlanc, were business visitors to Arichat, on Thursday.

The same day Alfred Boudreau motored Kaye McPhail and H. J. Hill to the Shire Town on business relative to real estate.

Proprietor John Fougere of the Hawker Market contacted his customers hereabout on Friday.

He regretted the passing of "Huskey" which was always first to greet him at the gate on anticipation of the luscious bone he was wont to get gratis, and which Mr. Fougere never failed to have in readiness.

CARELESS YOUTH

It seems to be almost a waste of effort to write warnings about traffic accidents says the "Hants Journal". But this week the warning is not against motorists, but to youths and children who habitually violate traffic rules.

Double riding on bicycles, failing to stop at street intersections and weaving in and out of traffic were just three accident causes which were noticed in the course of a walk around one block.

It isn't that the youths do not know better. They do. They know that handlebar passengers are prohibited. They know that stop signs are meant for them as well as for operators of motor vehicles. They know that weaving in and out of traffic is flirting with danger.

The possible penalty for such traffic violations is the possibility of an accident; the possibility of a violent death. But still they pay no heed.

The cure appears to be in parental discipline.

A family "padlock law" that would impound the bicycle for a week at a time, might just be what is needed to teach some youngsters the traffic rules.

Coal pays the Butcher, the Baker...

In the Maritimes, coal is the center of every community. Whether you live in Amherst, N.S., or Zealand Station, N.B., the prosperity of your community is inevitably linked with that of the Maritime coal industry.

The $50,000,000 which the Maritime coal industry distributes annually in wages affects the well being of all of us. The butcher, the baker, and even the candlestick maker all share in it through the daily purchases of employees.

In addition, the coal industry annually spends $15,000,000 for stores and supplies and provides $8,000,000 in business to the transportation companies.

NEW FULLY AUTOMATIC FURNACE

Actually pays for itself

The most modern development in domestic heating will be demonstrated in this area soon. You will want to see it.
Perfected by Nova Scotia engineers, this is the furnace which is making news in the heating world. In gleaming white enamel, it is only 40 inches long, 30 inches wide and 48 inches high. It costs little to buy and install and this cost is quickly returned in fuel savings.

COMFORT AND CONVENIENCE
This new principle of heating gives the householder *maximum comfort* and *unsurpassed convenience*. No stoking — no ashes to carry. And it is the most economical heating system yet devised.

IT REMOVES ITS OWN ASHES
With modern treatment of coal, most of the ash is eliminated. The small residue is carried by vacuum to a canister which can be outside the house.

IT CUTS FUEL BILLS
Coal is the most economical fuel available in Nova Scotia. This new furnace makes a further reduction and cuts costs of fuel at least 20 per cent lower than hand-fired furnaces. Savings over other type heating systems are relatively higher. It holds a fire with as little as ¾ of a pound of coal an hour.

IT IS ABSOLUTELY CLEAN
It is impossible for ash or dust to enter the furnace room. With this furnace, the furnace room floor can be as clean as the living room table.

IT IS FULLY AUTOMATIC
It feeds itself and carries the ashes — A thermostat regulates the heat.

Watch for the demonstration of this radically different home furnace.

Purchase and installation of Dosco's new furnace can be financed through a Home Improvement Loan available under the National Housing Act. See your Bank.
