Gulin Testing Programme In N.S.

In line with changing trends in the field of case-finding in the tuberculosis control programme, the Nova Scotia Tuberculosis Association in cooperation with the Department of Public Health, will shortly expand and intensify its tuberculin testing programme in Nova Scotia.

Since 19947 the NSTA has used the Mobile X-ray Survey as its main case-finding effort. This was a joint effort by the NSTA and the Department of Public Health whereby the Department staffed and maintained the Unit and the NSTA provided the organier for the surveys. During that time thousands of people yearly took advantage of the unit to have a free chest x-ray provided by the Department and the NSTA undertook the responsibility of the payment of chest x-ray costs for tubtrculosis contacts and suspects.

In 1958 the Nova Scotia Tuberculosis Association undertook a tuberculin test pilot study in and after some 12,000 tests were Kings County on a mass basis, administered, the results were sufficient to warrant the expansion of this type of case-finding.

This of course does not mean that chest x-raying is a thing of the past, because a chest x-ray is the only method whereby active tuberculosis can be discovered. Tuberculin testing does however, do away with thousands of x-rays per year. Negative reactors to the tuberculin test do not require an x-ray, and the positive reactors receive an immediate x-ray at the clinics. This cuts x-raying by roughly two-thirds. This type of survey will mean that instead of one mobile x-ray team in the field, more teams can be provided, giving a faster and much more efficient service to the public.

The NSTA will shortly employ two more nurses to carry out this programme. One team will be set up permanently on Cape Breton Island, which has approximately twenty-five percent of the population of Nova Scotia and the other will be on call throughout the mainland. One team is already working in Kings County. These teams will be provided by the NSTA and its branches and will work directly under the supervision of the Director of the Health Unit in which a survey is being done. It is probable that they will work first in areas of higher incidence in the province. They will use the Heaf test which has many advantages (1) It is economical (2)the apparatus is simple and easy to use, (3) the test is painless (4) the results are easy to read and are accurate.

The Executive Secretary of the NSTA, Ralph E. J. Ricketts said in making the announcement, that the method of case-finding is being changed on the advice of the Medical Advisory Board to the NSTA and with the full agreement of the Depart- a most progressive step in our ment of Public Health. This is efforts to combat tuberculosis and is in accordance with trends established throughout Canada and the United States. He said the association will be able to spread the benefits of the seal sale dollar over many more areas and many more people.

The recent announcement by the Hospital Services Commission, whereby the cost of formerly non-insured out-patient x-ray services, such as x-rays, will be taken over the Commission, releases the Association from this responsibility, along with costs of the Mobile X-ray Unit. This permits the NSTA to expand its case-finding services, find hidden cases of tuberculosis more quickly, and bring closer the day of complete eradication.

It is quite possible that 1959 will see an increase in the number of tuberculosis deaths, and the number of new cases discovered. No effort can be spared in searching for tuberculosis, and the lower the rate the greater must be the effort in finding reservoirs of the disease in a community, if we are to maintain the control now being exercised by the Department of Health.

Mr Ricketts said, this in no way changes the policy of the NSTA, which is that of Prevention through Case-finding, Education and Rehabilitation. It is a step we have been anticipating for some time and we are quite pleased that it has come about.

LIME
AN AID TO BETTER FARMING

Lime can make all the difference between a bumper crop and a poor one. What might have been a wretched crop of poor quality hay without lime, could be, with lime, an excellent crop running as high as 4 tons to the acre.

A SOUND INVESTMENT

Blast Lime: $1.50 per ton
Ground Limestone: $2.50 per ton.
in bulk carlots, delivered to your nearest railway siding. Transportation assistance on truck lots.
Good farmers find that lime is providing an investment return of about $19. for every dollar spent on lime!

ORDER NOW!

It is a good plan to spread your lime on sod land to be ploughed in the period immediately after harvesting. Nova Scotia's soils are sour, and need lime. The Department strongly advises you to order your lime NOW—to be sure of your best crop next year.

For information about the use and handling of lime, contact your local Agricultural Representative.

For the land's sake—use lime
